To Avert Civil War

Beirut Considers Appeal to UN

BEIRUT. Aug. 8 (UPI) - Lehaits post-civil-war army battered by Israeli-backed Christian militias, today considered call-ing for UN help amid indications that U.S. efforts to end the crisis had failed.

Meanwhile, sniper fire revived between Arab peacekeeping troops and the militias. Beirut's leading daily said that the militiamen were

preparing for all-out war.

A Lehanese journalist was wounded by two sudden sniner shots when she stopped at a securi-ty checkpoint in Christian East Beirut, witnesses said.

The militias last night unleashed their sharpest barrage yet in week-long shelling of army and UN posi-tions in the southeast border town of Kaukaba, claiming the first death among the Lebanese unit. Six

soldiers were wounded. With the army pinned down on its maiden mission — to reassert government authority near the Israeli border for the first time in 20 months - President Elias Sarkis met Premier Selim al-Hoss and other senior officials to seek a way out of the crisis.

Mr. Hoss, speaking to reporters, confirmed for the first time that Beirut was considering "as one

possiblity" summoning an emergency Security Council session.

Senior government sources said that the move was seen as a last resort, but was becoming increasingly prohable with the apparent failure of Washington to get Israel to pull the reins on its militia allies.

The UN commander in Lebanon, Gen. Emmanuel Erskine, who was in Kaukaba today after what an angry UN spokesman termed the "deliberate and calculated" mil-itia shelling of Nepalese UN posi-tions, told reporters: "Israel has not influenced the militias, as we have seen [from the attack] yester-

Americans in Europe Angry, Frustrated Over Tax Confusion Complaints of Harshness Grow, Lobbying Plans Are Weighed

By Jane Friedman PARIS, Aug. 8 (IHT) - This

week, the American director of a U.S. corporation in Frankfurt is preparing to return to the United States, convinced that he will be unable to make ends meet under a prospective new U.S. law that would tax Americans in Europe almost the same as if they were

The representative in Europe of a group of U.S. firms has written to his congressman: "We sim-ply cannot understand the rationale of a proposal to grant income-tax exclusions to Americans in large areas of the world where the cost of living is lower and to deny it to Americans in Europe where cost of living is

A U.S. newsman based in Europe wrote to his congressman: When will you lawmakers understand we are not here to live it up?" He complained of reals, "20 percent higher than in the United States, gasoline at \$2.60 a gallon, triple utility bills and unreimbursed taxes like the 17.6 percent value-added tax on all goods and services. . . even the

newspapers I buy every day." "I have taken a 12-percent pay it because the dollar has plunged," he continued, "but the French tax remains the same and so does my French tax obliga-

The letters were in response to recent moves by Congress 10 pass tax bill restoring the basic \$20,000 income exclusion for Americans earning income abroad but not for Americans working in Western Europe and

Exclusion Reduced

In 1976, Congress enacted a law reducing the \$20,000 exclusion to \$15,000, with the excess income to be taxed at higher rates. The law drew widespread complaints as being unfair. More than a year after Congress first suspended the application of that bill, the House Ways and Means Committee has approved a bill restoring the exclusion for Americans residing outside Western Europe and Canada and instituting a system of cost-of-living

The House Ways and Means Committee bill, which is expected to be the basis of a new law, will come down harder than ever on Americans living in Europe

and Canada. Although accounting firms have not yet calculated the effects, lawyers estimate that taxes on some Americans in Europe could double. The new law would most likely affect 1978

The reaction to spending a year and a half in tax limbo is anger, frustration and, in some cases, rebellion. While a taxpayer revolt seems premature, lawyers in Paris report that Americans are "looking into ways to reduce their overall tax burden." Some tax lawyers say that the number of internal revenue audits bere are skyrocketing with inspectors looking for unreported income. The Internal Revenue Service has refused to comment on this or the overall tax situation.

Going It Alone

"All this turbulence has made Americans abroad more aware of the fact that the United States goes it alone and is not in keeping with the international concept of taxation and even with American legal concepts based on domicile," said John Fredenberger, an American lawyer wbo

The problem dates from October. 1976, when Congress reduced the income exclusion to \$15,000. A barrage of criticism trailed the bill's passage. By May of last year, the House and Senate had suspended application of the new law for 1976 income. However, further attempts to delay its application were stymied by Sen. William Proxmire. D-Wis., who called Americans living abroad "mink-swathed high-living jet-setters living at the taxpayer's expense," and insisted on a permanent solution immediately. Finally, last May, the Senare passed a bill that included cost-of-living deductions and a suspension of the 1976 provisions for 1977 income. Last month, the House Ways and Means Com-

mittee passed its bill. Since May, 1977, the Internal Revenue Service has postponed filing deadlines at least four times. Now, as the filing date for 1977 income approaches, Americans abroad are still in limbo. If Congress recessed tomorrow, the harsh 1976 law would apply. But tax consultants are betting on the pre-1976 law applying to 1977 income. The IRS has posted Oct.

15 as the new deadline, but any interest or penalties due would be calculated from April 15. A lobbying and letter-writing effort launched by several organizations last year has been inef-fective. The only successful cam-paign was waged by the construction industry, which fought to get

an income exclusion primarily for workers in the Middle East, It won the fight when the House Ways and Means Committee voted to restore the \$20,000 exclusion except for Americans in Europe and Canada. According to Richard Kenyon. tax manager for a major U.S. accounting firm, the Ways and Means bill would increase the annual tax burden for U.S. companies by up to \$13,000 for each American employee overseas.

Mr. Kenyon says he expects companies to reduce the number of American employees bere. Already, one major American corporation in France plans to phase out 70 Americans, replacing them with French nationals. Many Americans are appar-

ently fed up. "Starting with 1976," said Reid Feldman, a lawyer with Surrey, Karasik, Morse

and Goekjian, "the regard of Americans ahroad for the American political process has gone down." Some Americans have reportedly threatened to renounce their critizenships. Others, who plan to stay in Europe, apparently have moved to liquidate taxable assets in the United States, putting them either in the hands of foreign-born wives or filtering them through Swiss banks into "underground" assets. Stockbrokers are rumored to be feeling **Changed Attitude**

I've become a father confessor, reported a tax-return pre-parer. These people want to tell someone besides their wives they're going to cheat. I'm glad they do. I can't help them but I can tell them what could happen if they're caught." He added that the attitude of Americans has changed. "They used to be willing to accept the U.S. tax burden." he says. "Now the government wants more money and is not protecting them against incursions by the French.

Complicating the tax situation for Americans in France is a new French provision that next year will tax the worldwide income of (Continued on Page 2, Col. 4)

News Analysis

Christian-Syrian Fighting Threatens 2d Beirut War

By Marvine Howe

BEIRUT, Aug. 8 (NYT) — Every will be able to work out a disen-night, defiant Christien militias gagement agreement between the snipe at Syrian peacekeeping troops here, who respond with almost every weapon in their arsenal in what appears to be a senseless exercise in destruction. In reality, the two forces are engaged in a dangerous showdown that is closely linked to the overall Middle East

The Syrians, who were charged by the Arab League to restore order here after the 1975-76 war, have made it clear that they will not tolerate further challenges to their authority from the militias. Damascus is concerned by what it sees as moves by Lebanese Christians toward partition, with the open support of Israel.

The Phalange and the National Liberal Party, the country's two for Christian Maronites, the strongest Christian parties, have premier's office for Sunni or orthoshown that they are just as deter-mined to resist by force what they ment for Shia Moslems and the see as a Damascus plan to turn deputy prime minister for the Lebanon into a Syrian colony, and Greek Orthodox. Parliamentary are obviously banking on Israeli insections of their side. tervention on their side.

The exchange of fire has been fierce but relatively limited. The new round of fighting broke out July 1 and has left more than 300 civilians dead on the Christian side, an unknown number of Syrian casualties and vast destruction to Christian East Beirut and the industrial suburbs.

New War Predicted

Some political observers predict a resumption of the civil war hut with much greater risk of a direct Syrian-Israeli confrontation. Nevertheless, the forces not in-

volved in the immediate conflict have shown considerable restraint. The majority of Lebanese Moslems and Christians appear satiated with violence and have been unwilling to get involved, Likewise, Palestinian guerrillas have insisted that it is a Lebanese affair and are careful not to respond to occasional shells that fall into their quarter.

Israeli officials, who have de-clared publicly that they will not let the Syrians "annihilate" the Lebanese Christians, have sent fighter planes to buzz Beirut and have given firm support to rebellious Christian militias in the south. But they are reluctant to intervene directly against the Syrians at this time, according to knowledgeable diplo-

Compromise Sought

There is still bope in diplomatic quarters here that the middle-ofthe-road Chrisoan president, Elias Sarkis, and his middle-of-the-road Moslem premier, Selim al-Hoss,

Protesters Foil Whale Hunters Off Spain Coast

LONDON, Aug. 8 (AP) - Antiwhaling protesters from the Cana-da-based Greenpeace Foundation sailed into the path of a Spanish whaling fleet in the Atlantic on Saturday and prevented the harpooning of a group of fin whales, Greenpeace said today.

Word of the protest action off the northwest coast of Spain, near La Coruna, reached London by radio from the Greenpeace vessel, Rainbow Warrior, a 145-foot former trawler used by the conservation group to keep watch on Atlantic whaling fleets.

"The crew launched three small inflatable rubber craft with volunteers on board, which sailed between the harpoon ships and the wbales," a spokesman said. They successfully prevented harpooning of the whales, which are 55 to 70 feet long and protected in all the oceans of the world except the North Atlantic.

After the intervention, the Rainhow Warrior was boarded by the Spanish Navy and sold that its action had been illegal. The Greenpeace boat was told to head for Spain, but instead sailed toward Portuguese waters.

gagement agreement between the igerants.

"We are the inactive majority," a Lebanese Christian woman said this week. "We're fed up with the fighting and we bope the president can find some sort of compromise." While Lebanon's rightist Christians get most of the headlines, they are in fact a minority on the politi-

There is no accurate population count because there has been no official census since 1932; the subject is too sensitive. But Lebanon is believed to have roughly three million inhabitants, with more than half of

them Moslem. Political power here is distributed proportionately along religious lines according to the 1943 National Pact. The presidency is reserved

Maronite Support

The Phalange and Nacional Liberal parties undoubtedly have the support of the majority of the 600,000 Maronites, but they clearly do not represent most of the Lebanese or even most of the Christians. Both parties are strongly nadonalist, anti-Communist, and-Palestinian and essentially anti-Arab, particularly anti-Syrian. The Phalange is older, better organized, more po-pulist than the somewhat bourgois Liberals. The Phalangists have a standing militia force of 5,000 men and can easily muster 15,000, while the Liberals are said to have a permanent force of 2,000 and can mobilize 5,000.

But there are other Christians, such as the Christians of the north who are followers of former President Suleiman Franjieh. They are said to number about 100,000 and have a small standing militia of 2,000. They are also fiercely nationalist, conservative and have fought against the Palestinians in the war. But they differ from the Phalange and the Liberals in that they believe that Lebanon cannot survive without Arab aid, namely Syrian,

and oppose links with Israel. There are also Christian liberals, followers of the former reformist President Fuad Chehab, who sup-port Mr. Sarkis and in normal imes are considered the majority. But they have no voice, perhaps because they have no militias.

Minority Leftists

Christian leftists are a minority but make up the cadres and leadership in most of the leftist parties, including the Lebanese Communist Party, the extreme left Lebanese Organization of Communist Action, the Movement of Christian Patriots and the Popular Syrian

Party.
On the Moslem side, the large majority are followers of the traditional conservative leaders such as the Imam Mousa Sadr, former Premier Saeb Salam, former Premier Rashid Karami from the north and parliamentary speaker Kamal Assad from the south.

There is an increasingly militant youth attracted to the Nasserite Mourabitoun Party and the Progressive Socialist Party wbose Druze leader, Kamal Jumblat, was assassinated last year. The Imam, Mourabitoun and the Progressives all bave their own militias, each said to number about 1,500 men. But in case of a crunch, the Moslems generally count on aid from the Palestinian guerrilla

organizations, who number about 10,000 men under arms. If the Syrian-Christian militia conflict deteriorates, diplomatic sources fear that all these forces will be dragged into the fray once again. But this time Israel would find it difficult to avoid backing its Christian friends, if they were attacked by the Syrians and the Palestinians. This is where the danger of an international conflict bas increased, because during the Lebanese war, the Syrians had helped the Christians to keep the Palestini-

As Grip of War Tightens

Rhodesia Appears Complacent

By John F. Burns

SALISBURY, Rhodesia, Aug. 8 (NYT) — As the guerrilla war tightens its grip on Rhodesia, visi-tors are increasingly struck by the complacency that pervades this sun-washed capital.

Apart from furloughed soldiers strolling the broad boulevards in camouflage dress and nooces everywhere urging precautions against bombs, little suggests that white Rhodesia is struggling to avert a bloody collapse.

The comfortable sense of calm is percepoble along the route from the airport. As the bus rolls past rows of neat suburban bungalows. black gardeners can be seen waterbougainvilleas while black maids in gingham dresses watch over towheaded children. Freshly clipped lawns connect tennis courts and swimming pools.

In town, people wait in line for hours for tickets to a rugby match, and a string quartet from Britain draws a respectable turnout to a formal evening of Bacb and Beethoven. Almost every night there is a bingo game in a church ball. Weapons, de rigueur for an outing almost anywhere else in the country, are rarely seen bere.

Some residents say the apparent normality masks anxieties that can

be discerned in rising rates of alcoholism, divorce and suicide. bers began chuckling and whisper-But others say that there is a refus-ing. Mr. Bwanya shrugged and conal, even now, to accept that the fu-ture will bring radical changes in the white minority's privileged way of life. A major influence has been Prime Minister fan Smith, who has promised that safeguards being built into the majority-rule conso-tution will allow whites to "main-

With the town's 100,000 whites oing about their affairs as though little has changed, it is no surprise to find old babits persisting in Leg-islature. Debates in the musty chamber of the Assembly, where 50 members of Mr. Smitb's governing Rhodesian Front confront 16 black opposition members, suggest that attitudes born of decades of white supremacy survive even as Mr. Smith prepares to surrender power

This was illustrated a few nights ago, when a black member, M.P. Bwanya, representing a huge con-stituency along the Zambezi River, rose to commend the Department of National Parks for its efforts to preserve wildlife.

"If these animals were just left," he said, "in 10 or 20 years time our grandchildren would not be in a position to know what a lion looks like or what a baboon looks like."

Castro yesterday after accusations of government involvement in co-caine sanuggling to the United \$1.25 million in bribes from United States and appointed themselves a Brands, the American exporter of three-man ruling junta.

A communique by the junta said Brig. Gen. Melgar Castro. 47, had resigned. It that said Gen. Policarpio Paz Garcia, the chief of the armed forces and commanding general of the army, would head the junta as chief of state, and the other members were Lt. Col. Domingo Alvarez, chief of the air force, .nd Lt. Col. Amilcar Zelaya Rodriguez, chief of public security.

The junta pledged to respect previous international commitments.

No disturbances were reported. It was the second military house-

Colombia Chief **Promises Fight Against Crime**

BOGOTA, Aug. 8 (UPI) - Julio Cesar Turbay, sworn in yesterday as president of Colombia, pledged to crack down on terrorists and drug smugglers who do a \$1-bil-

lion-a-year business. The "democratic leftist," as he calls himself, defeated a field of conservative candidates in the election June 5. Yesterday he promised to work closely with the armed forces against crime of all kinds, to try to save Colombia "anarchy."

But he sold an audience of politicians and visiong dignitaries, including U.S. Treasury Secretary Michael Blumenthal, that he would not invoke martial law.

"We will not retreat from the decision to prevent Colombia from falling into the abyss of anarchy. But I can assure my fellow countrymen that their liberties will not be in danger, nor will [constitutional] guarantees suffer restrictions in my hands," Mr. Turbay said.

TEGUCIGALPA, Honduras, cleaning in three years due to Aug. 8 (AP) — The commanders of the Honduran armed forces ousted President Juan Alberto Melgar Arellano with Gen. Melgar Castro in April, 1975, after Gen. Lopez Honduran bananas.

Coup in 1963

Gen. Lopez Arellano had come to power in a military coup in 1963, permitted 18 months of elected government in 1971-72 and then overthrew President Ramon Ernesto Cruz in 1972.

Opposition parties have been accusing the military regime of widespread corruption among gov-ernment officials and senior military officers.

Manuel Gamero, publisher of the newspaper Tiempo, was jailed for a week in June for a series of articles alleging that high-ranking officials were involved in a \$30-milion-a-year operation smuggling co-caine to the United States. The judge said Mr. Gamero was not telling all he knew and found him guilty of "concealing evidence."

The articles said officials were allowing shipments of cocaine to be smuggled through this Central black speaker. The black members.

American nation from Colombia to some of whom have been in the asthe United States.

The jailing set off student riots in San Pedro Sula, the second largest city 170 miles north of Tegucigalpa. the capital. The demonstrators claimed the charge against Mr. Gamero was "trumped up" by the government. More than 200 persons were reported injured during the three weeks of rioting, and hundreds of demonstrators were arrest-

tinued, and among other black members, there was little discernible reaction. Since 1962, when the first hlacks took their seats in the Assembly, schoolboy jibes have been part of the black legislator's Perhaps the jibes are easier to

bear these days. Under an agreement with three moderate black leaders signed March 3, Mr. Smith has promised to hold an election by the end of the year that will assign 72 of the 100 seats in the Assembly to blacks. In the meantime, Mr. Smith and the three black leaders comprise the so-called transitional or interim government.

Black Legislators

Most of the 16 blacks in the Assembly prefer the U.S.-British plan calling for talks with the black guerrillas who have fought the gov-ernment for many years, but like most of their countrymen, the black legislators take comfort in knowing that white rule is drawing 10 an end.

For a black, even running for office is courageous. Five months ago, one black assemblyman was his theological education in Rome, and had been one of the several unhacked to death with an ax by his ond Vatican Council, beld from own son, on the orders of guerrillas who accused the assemblyman of "selling out." It took weeks to find In that role be had impressed Paul with his diplomatic skills in bridging differences between op-posing factions of bishops attend-

a replacement.

Most of the 16 have attempted to steer a middle course between the government and the guerrillas, but their efforts have won little respect from white assemblymen.

This week, several of the blacks, arguing that delay would only in-tensify the war, pressed Mr. Smith to accept the U.S.-British invitation to a conference with the guerrillas. Nearly 2,000 Rhodesians have died in the war since the March 3 agreement.

They also pressed for an early end to racial discrimination, an issue the transitional leaders referred to a committee, which today an nounced a program to end bias in most public places. Blacks are being denied service at many of the best hotels, wounded black soldiers cannot be treated in white hospi-tals, and more than 200,000 black children whose schools have been closed by guerrilla pressure go without education, although white schools have thousands of empty

Among white assemblymen, the appeals were met with heckling. They accused the blacks of acting as mouthpieces for the "terrorists. Mr. Smith took no part in the heckling, and he rose at the close to thank the blacks for their contributions, which he described as constructive. But the 59-year-old prime minister referred to photographs each time he wished to identify a

sembly for years, guffawed when they saw the photographs. Among diplomats promoting the U.S.-British plan, the attitudes of the white members are considered tragic. "Smith is no fool, he knows he's got to come to the conference,

WASHINGTON, Aug. 8 (WP)— U.S. diplomats are living too high on the hog, renting living quarters abroad that are too big and too expensive, according to a recent General Accounting Office report.

As a way of saving money, the watchdog agency recommended that the United States purchase or huild suitable housing for its overseas employees in a number of The State Department's Office of Foreign Buildings is responsible for about \$3 billion worth of U.S.-

owned and leased property in 21 cities and 135 countries. The GAO found that management is fragmented among many offices. As a result, it said, overseas construction programs are ineffective and both owned and leased property is not properly maintained, leading to cost overruns or devaluation of

The situation constantly irritated Chinese pride. A mob in 1884 burned many of the buildings. An-

For the last 30 years Peking has tried to motivate young Chinese with the memory of those days, when places like Shamien were, in Peking's words, the "headquarters for the imperialists' political and economic aggression against the Chinese people."

Communist Party Chairman Hua Kuo-feng sounded the theme again in a recent report to the National People's Congress. "In the 105 years from the 1840s to the middle of the 1940s, almost all of the imperialist countries of the world com-mitted aggressioo against our country." he said. "If, in the decades to come, we don't completely change the situation in which our economy and technology lag far behind those of the imperialistic countries, it will be impossible for us to avoid being pushed around

Sought-After Island

Yet, on this old sand spit, those memories have almost completely faded, along with the action-pro-voking fears and hatreds that Chairman Hua and others might have hoped to inspire. Today, the I have been here for more than man told us, this is one of the most 30 years," said the man, who sought-after neighborhoods to live appeared to be in his early 60s, "I in in all of Cantoo.

The old colonial mansions have been carved toto flats for scores of Chinese families. People like the cool breezes from the Pearl River Mobs Martyrs and the relative quiet that comes In those days Chinese were for- from being cut off from Canton's

The Western powers set themselves up at Shamien after their victory in the second opium war in 1858. The war had woo them greatly expanded trade privileges and territory throughout China, but their homes and warehouses in Canton had been burned. They decided this time to settle on a partly submerged sandbank on the Pearl accot to Ca

With \$300,000 and the labor of countless Chioese coolies, a treeshaded island of spacious homes and offices was created that provided a fair approximation of the ni-ceties of genteel European life.

Christ Church was built at one end for the English, and a small Catholic church at the other for the French. There was a gentlemen's club and a lawn tennis and croquet

Coins in the Dust

The buildings remain, although many are desperately in need of paint. The French church is a factory, its vestry littered with machin-ery. The British courcb we gazed at, the man told us, was now a carpen-

try shop for repairing furniture.

A Chinese tour official had earlier told us his most vivid memory of Shamien. One night just before the Communists took over Canton, he watched two Europeans get off their rickshaws at a hotel on Shamien, toss their money onto the ground, and laugh as the rickshaw men scrambled in the dust for the coins made almost worthless by

wartime inflation.

The official said that he vowed to tell his children some day about that moment of bumiliadon, and he eventualy did, several times. "But they seemed rather bored by it," he

The man who had stopped to talk to us said that be works now for one of the government trade organizations. His office has helped turn the old exploitation around by making a tidy profit from dealings with the Westerners who flood the semiannual Canton trade fair.

Judge Gets Strawberry Shoplifter Out of Judicial Jam in Maryland

WASHINGTON, Aug. 8 (WP) — A suburban Washiogton judge could have sentenced Jacqueline Datcher to 18 months in prison or a \$500 fine for eating strawberries in a supermarket in February. Instead, Judge Howard Chasanow yesterday placed Miss Datcher, convicted June 26 of shoplifting the strawherries, oo probation

for six mooths and ruled that the only time she will have to serve will be a half day next Monday working in the Maryland park After Miss Datcher was convicted, newspapers and broadcasting stations were deluged with telephone calls and letters from people who found the conviction for eating two cents worth of mer-

chandise outlandish. Jumbo Food Market, which decided to press charges against Miss Datcher, expressed regret that the case had gone to court, saying it was a misunderstanding. In February Miss Datcher was arrested at Jumbo's in Maryland by a security detective who al-

legedly spotted her eating two strawberries. Store officials said later they pressed charges only because they were under the impression that Miss Datcher bad attempted to

steal more than the strawberries. The jury convicted Miss Datcher after hearing her version of the story and the security man's. Each claimed the other had been abusive after the security man approached Miss Datcher.

'Hitler's Judge' Filbinger Quits

By Harry Trimborn

BONN, Aug. 8 - Hans Filbinger, once a likely candidate for the largely ceremonial but presu-gious office of president of West Germany, resigned yesterday as premier of Baden-Wuerttemberg amid mounting criticism of his role as "Hitler's naval judge."

The departure of the 64-year-old head of the country's third-larger.

head of the country's third-largest state apparently clears the way for a political leader with a less controversial link to the Nazi era, Stutt-gart Mayor Manfred Rommel. He s the son of the late Field Marshal Erwin Rommel, the "desert fox" of

Afrika Korps fame. Mr. Filbinger's resignation came after three days of marathon conferences by members of his Christian Democratic Party, the powerful conservative opposition in the federal Parliament

and had been premier of Baden-Wuerttemberg for 12 years. Announcing his resignation at a press conference in Stuttgart, he said that he was the victim of a campaign of

judge and prosecutor in World War II. In a February article in the na-tional weekly Die Zeit, playwright Hans Hochhuth pinned the label "Hitler's naval judge" on Mr. Filb-

Decade of Damage Feared

Brittany Oil Pollution Persists

By Ronald Koven

Four months after the supertanker Amoco Cadiz went aground on the rocks off this Breton fishing village. French soldiers are still scratching away polluted surface sand around the little barbor with tiny triangular gardener's trowels.

We'll never get it clean. The sea will have to do the rest," said a hare-chested young soldier who. along with the rest of his 100-man tank unit, had been desultorily roweling the sand for two weeks.

A few hundred yards off the coast, the prow of the ship that spilled more oil into the sea than any other still juts in the air toward the beach. When it broke up on the rocks, an estimated 1.5 million barrels of crude oil flowed out to pollute waters and shores in all direc-

U.S. scientists estimated that about one-third of the oil was washed ashore, while the rest was lost to evaporation and the sea. The spill caused havoc to wildlife and severe financial losses to the shellfishing, seaweed-harvesting and tourist industries. A recent report by an investigating committee of the French Senate estimated that cleanup costs and damages would total more than \$100 million.

Most of the affected spots along 250 miles of heavily indented coastline are cleaner looking than Portsall. Appearances, however, are of-

Trapped in Sediment

Sixty miles by road from the site of the wreck, in the bay of Morlaix where half of Brittany's oyster production is located, scientists esti-mate that 40,000 to 50,000 tons of oil brought in by the tides is trapped in the fine, sandy sediment. At the time of the disaster, little surface oil was visible on the

Scicotists say that long narrow inlets like the bays at Morlaix and Lannion face the most troubled future. Bacteria that "eat" petroleum deposits require buge amounts of oxygen, and the waters of the narrow bays do not get stirred up

flat fish such as Dover sole. In the Aber Benoit, a fjord-like tale petroleum iridescence.

More Like a Decade

Alain Madec. 57, a third-generation oysterman and the biggest producer in the Aber Benoit, is still destroying his oysters so that "there will be no suspicion placed on the rest of Brittany's oysters."

He spoke optimistically of resuming production in a year or two. But Breton scientists who know the Aber well do not share his optican again be growing in the mud flars of the Aber Benoit.

Except in deep bays, the ecological effects are severe but not as bad as at first feared. Most of the northern coast of Brittany is not going to be a desert. Some species may be replaced by others, but life will

It has taken 11 years for Britain's Cornwall coast, hit by the Torrey Canyon oil spill, to recover com-petely. Those parts of the Breton coast exposed to sea and wind action may require less time. A very important lesson was learned in the Torrey Canyon disaster and applied in Brittany at the insistence of Breton mayors and scientists: Almost no detergent was used.

The Torrey Canyon oil was cleaned up very fast with detergents, but they doubled the toxic effects in marine life. What the oil did not kill, the detergents did.

Eggs Disintegrate Fast

Nevertheless, scientists express fear for the future of a number of species of marine animal and plant life. Lucien Laubier, head of the

S. Africa Frees **Botswana Priest**

From Detention

JOHANNESBURG, Aug. 8 (UPI) — Michael Molale, Anglican dean of Botswana, was released from detention yesterday after being held by security police for 13 days, a police spokes man said.

Mr. Molale, 45, was detained on July 26 while en route from the Botswana capital of Gaborone to Umtata, capital of the independent homeland of Transkei. The spokesman said only that he was held for

Botswana government sources said formal representations were made to Pretoria for the release of the churchman, a Botswana citizen.

Church sources said that the dean was actively involved in belping South African refugees who fled to Botswana. They said that South African police last year con-fiscated the dean's diary when be was in transit on his way back from a Singapore conference.

Jailed IRA Men To Charge U.K. On Civil Rights

BELFAST, Aug. 8 (AP) - Four Irish Rrepubican Army men jailed in Northern Ireland's Maze Prison plan to charge the British govern-ment with violating their human rights, their families said yesterday.

The prisoners' attorneys will file the complaints before the Europe-an Commission on Human Rights in Strasbourg, France, later this Spain Holding

week, family members said.

The four are among 308 IRA men in Maze who for two years have been demanding to be designated political prisoners instead of For Extradition common criminals.

The "special category" political March 1, 1976. That status allowed prisoners to cojoy privileges such as wearing their civilian clothes and receiving extra parcels. Since their protest began, the IRA mco have refused to wear prison clothing and instead go naked or wear blankets. Five months ago, they began refus-ing to use toilets, wash or elean their cells.

Informed sources identified one of IRA men as Kieran Nugent, 22, who is serving a three-year sentence for hijacking. The other three are

"We could see the cadavers of footprint in the oozy mudflats is black and filled with strands of tell-tale petroleum iridescence.

Mr. Laubier said, "but the eggs and larvae are tiny, and they disintegrate fast. They are tale petroleum iridescence. pollution than grown animals. We can suppose that a very large proportion of the eggs and the young animals were killed in a band extending three or four miles out to

Eighty percent of France's commercial seaweed production was in the area hit by the oil of the Amoco Cadiz. This year's harvest was practically wiped out, and scientists express fear that so many plant spores were destroyed that seaweed mism. They think it will be more may be radically reduced for sever-like a decade before edible oysters all years. That could have disastrous effects on the food chain of marine

> Fishing was perhaps the least bard hit of Brittany's maritime industries. Fish fled the area when the oil came. Fishing was halted in the region for only a month to six weeks. Now, say scicotists, fish tak-en from right under the wreck of the Amoco Cadiz seem perfectly good to eat, although they look

Dramatic Declines

Court cases involving the Amoco Cadiz will probably go on for years. The suits over the Torrey Canyon are only now being finally settled.

It is not only in the affected beach towns that tourism is down this year. Although only a quarter of Brittany's coast was actually hit. even towns in the interior and on the southern coast, where there was no oil at all, are reporting dramatic declines in business.

In the Finistere district, which covers parts of both the north and south coasts, the chamber of commerce reports that business is down 40 percent in the hotels, and that there were 60 percent fewer for-eigners. West German tourists, who

almost completely absent.

There are a lot of incalculable costs as well. Col. Philippe Millon, head of the French league for the protection of birds that runs the great bird sanctuary of Seven Isles, asked, "How do you place a value on a dead puffin?"

Scientists believe that about 20,000 birds must have been lost. The hardest hit were the puffins, guillemots and auks - three related birds that fish at sea.

Steady Pollution

The puffins have been declining everywhere because of the increas-ing pollution of the seas. "If pollu-tion just continues at its steady rate of 6 million tons of petroleum products into the sea a year, the puffins, the guillemots and the auks are condemned to extinction," said Col. Millon. Claude Chasse, research director

biology laboratory, told of bow oy-sters from Alain Madec's beds in the Aber Benoit had been found with 300 parts per million of petro-leum, a level at which they give off a marked odor and are inedible.

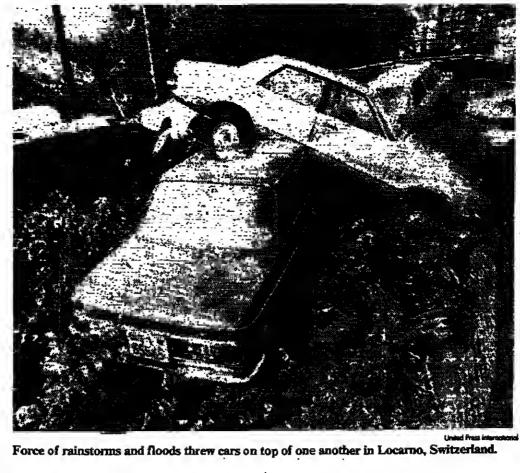

They were put in sea water in an unaffected zone. Within 25 days, they had flushed themselves out to 66 parts per million, almost as low as the local oysters, which bave 56 parts per million. So nature is good at righting itself - but even at 56 parts per million, oysters are approaching the limits of what is

tolerable. "We are very close," said Mr. Chasse, "to baving nothing but inedible products in the sea. The Amoco Cadiz was only the visible part of the pollution."

By William Borders

COCHIN, India (NYT) - In a suburb of this steamy south Indian scaport, a young government clerk stays up late at night, studying Hin-- a language that almost no one bere speaks — because he fears that "without it, there's no future in the

In the largely Hindi-speaking state of Bihar in north India, the state government recently outraged people who did not know Hindi by sending them communications written only in that language. And in Madras two weeks ago, the chief ministers of four southern states met and deplored what they saw as an attempt by the national govern-ment "to covertly impose Hindi" on people with another native lan-

guage.
"This conference voices its apat the University of Brest's marine prehension that any further at-biology laboratory, told of bow oy-tempt to impose Hindi is likely to erode the confidence of the non-Hindi-speaking people in the government, the heads of the four state governments declared.

The unusually blunt tone of their statement reflected the intense feelings about language. Many people in this region, 1,000 miles south of New Delhi, regard the language issue as one of the country's gravest domestic problems, with a strong emotional charge and a potential for bitterly dividing the country, north against south.

Huge Diversity

India's language problems, a product of the buge country's great diversity, have been around since long before independence, causing bitter controversy and, occasionally, rioting and deaths. But the ten-sions have heightened in the 16 months since Prime Minister Morarji Desai came to power, replacing Indira Gandhi.

Although the official advance-ment of Hindi bas been a nanional policy for years, many south Indi-ans fear that Prime Minister Desai is less committed to protecting the rights of their regional languages than Mrs. Gandhi was. That helps to explain the good showing at the polls that Mrs. Gandhi's party made recently in the south.

And Mr. Desai does little to dispel the fears here, frequently indicating that "the use of Hindi for official purposes is bound to increase as the years pass," as he said a couple of months ago. In the last year, for instance,

New Delhi has begun using Hindi in its messages to federal offices here in the south, although still

seas. Indian embassies were formally instructed to substitute Hindi for English whenever possible in their diplomatic activities.

Speech at UN

"One of the landmarks," the government declared in an annual review, "was the speech in Hindi by the minister of external affairs at the United Nations General Assembly in October, 1977, thus giving Hindi its rightful place in the community of nations."

Although Hindi is spoken by only a third of India's 630 million people, it is by far the most common of the dozen major regional languages. And it can be understood rather easily by some of the people who speak the other tongues of north India. But it is incom-prehensible to south Indians who speak one of the Dravidian languages, such as Malayalam, the native language of about 30 million

The 1950 Coostitution designates Hindi the official language of Indibut subsequent legislation guarantees that English will be used along with Hindi for people who do not understand Hindi. It is that assurance that the southerners fear might be eroded in New Delhi's new, pro-Hindi mood.

Even here in the south, some Indians welcome the promotion of Hindi for reasons of national unity. But others regard English, though it is the nan've language of almost no one in India, as a valuable buffer against Hindi. As a government official here said privately, "I'd

Polio Virus Hits 15 in Canada

TORONTO, Aug. 8 (UPI) - Fif-teen persons have been quarantined after laboratory tests showed the presence of paralytic polio Dennis Timbrell announced yesterday.
All had been in contact with

three Ontario resideots receiving treatment for polio, the first cases in the province in five years. Mr. Timbrell emphasized that those quarantined under the Public Health Act showed laboratory evidence of virus but were "not sick."
The 15 quarantined persons ex-

hibited no elinical symptoms. They will be monitored by local health authorities and remain quarantined until they can be safely released. Mr. Timbrell said.

Stork Population Alive

storks and, consequently, the leg-endary protection against fire of the houses on which they nest. So now the villagers and farmers of the Schleswig moors, with help from the West German Army, are recreating and stocking ponds to provide the storks with enough to

And, in case the man-made ponds go dry, taxpayers in the vil-lage of Bergenhusen have chipped in to buy a community freezer in which to store emergency stork ranons of fish. The villagers of Bergenhusen and the rest of the Stapelmoor, north-

ern Europe's largest stork sanctuary, recall 1976, one of the driest summers of the century and one that just about wiped out the already dwindling stork population.

There wasn't a single mouse or frog anywhere," said Wulf Hansen, a veterinarian in Bergenhusen. "The parent storks were throwing

der to survive." **Emergency Action**

their young out of the nests in or-

Villages in the moors took emergency action that year. Bergen-huseners, for instance, bought and fed their storks about 7,000 pounds of fish.

Every afternoon at about 4:30. about 50 storks gathered in a pas-ture waiting for food," Mr. Hansen said. "At least all of the adults survived.

But villagers realized that they had to act quickly if they were to save the storks. Storks feed primarily on frogs, moles, mice, snails, earthworms and insects. Draining the swamps to increase the amount greater numbers.

HAMBURG, Aug. 8 (UPI) — of arable land wiped out their supply base.

This spring the West German

and lakes which were stocked with frogs and small fish for the storks.

Power lines on poles take a heavy toll of storks, which fly low, each year. So Bergenhuseners put their wires underground, at considerable expense

Nesting Preferences

Storks are particular about where they build their crude nests. They prefer the traditional thatched roofs of northern Germany. Insurance companies, who question the folk belief that a stork nest on the roof protects the house against fire. have convinced many villagers to switch to synthetic roofs, which storks abhor, mainly because their nests slide off.

Stork fans recalled that their forefathers used to attract a stork pair by placing an old carriage wheel atop the roof to give the birds a base for their nest. So old carriage wheels were re-

moved from barns and mounted on new roofs. At the same time, the local utilities company agreed to mount wagon wheels atop some of its light poles. The emergency program is show-ing results. Bergenhusen Mayor Hermann Schriever said, "We had

25 pairs breeding bere this year, and that is two more than last year. Counting the young, we have 100 storks in Bergenhusen this year." Soon the storks will head for Africa to spend the winter along the Nile. But Bergenhusen knows now

they will return next spring, and in

Theater in France

Jean Marais Tries Lear: He's Every Inch the King

SETE. France. Aug. 8 (1HT) — speaks for itself compellingly. All is fresh, swift, seemingly spontaneous and abounds vitally. turned to Shakespeare. This week at the festival at Sete, the Mediterranean summer resort, he is the Lear of a vivid production of the tragedy in an alfresco theater, with the night sky and the sen as an imposing backdrop.

As the self-dethroned monarch

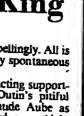

he has majesty and eloquence. Sporting the traditional white shiskers, he is every inch the king whiskers, he is every inch the king whiskers, he is every inch the king at the start as he stands in blind pride, wearing horned crown and regal robes, disposing of his realm and treatment as the hounded, hareheaded vagrant in tatters, curstiment and treatment was the hounded. ing ingratitude and treachery as the sorm rises and his woes multiply. It is a riveting performance. Paris will see it in January when the Theaire du Triangle troupe visits city

There are as many theories about the playing of Lear as there are about the playing of Hamlet and that way madness often lies. Since the play and its main figure are of fantastic proportions, both have received exotic analyses. This titan-ic tragedy of human life rises above the improbabilities of its premise and melodramatic action through the author's masterly art.

"There rings forth from it."
wrote the perceptive Danisb critic.
Georg Brandes. "a chorus of passonate, jeering, wild yearning and sonate, jeering, wild yearning and by his fire at night. Shakespeare by his fire at night, Shakespeare by h heard them in the roar of the storing in the windowpane, in the howling of the wind in the chimneys—beard all these terrible voices mother as in a fugue, and heard in them the torture-shriek of suffering

hemanity."
Some have found this insuffiient achievement. Not long ago we sere treated to Edward Bond's that misformed the ruined ruler of the - Dark Ages into a Victorian capital-

incluttered by any peculiar inter-

There is effective acting supporting Marais: Regis Outin's pitiful Gloucester; Jean-Claude Aube as his conniving bastard son: Alain Roland's elfish Fool with his stock of wry jests; Giselle Touret and Annie Bertin as the evil daughters; Claude Alexis' gentle Cordelia: and Jean-Pierre Moreaux's haughty stewart, Oswald.

Michel Bernardy's new French version, compressing the original here and there, succeeds in reproducing the mighty sweep of the tragedy and in echoing its poetic

Bernardy is presently engaged in bernardy is presently engaged in translating the complete work of Shakespeare into French, and Marais, who has great faith in his talents, is anxiously awaiting his version of "The Tempest" because he hopes next to play Prospero.

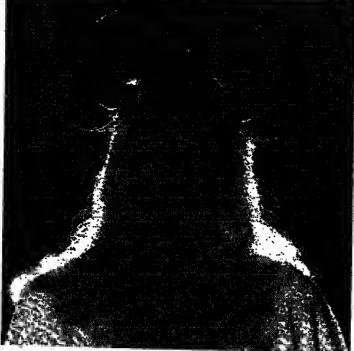

Divested of his Learish whiskers and makeup Marsie now 65 has

and makeup, Marais, now 65, has changed very little. His face is lined, but he retains his classic fea-

tures and physique.
"I made my debut in Shakespeare," he said after the threehour performance. "I was a student of Charles Dullin, and my first proressional performance was as Mal-colm in 'Macbeth,' acted by a young company during the 1937 Paris Exposition. Since then, however. I have done no Shakespeare until now. When I was a member of the Comedie-Francaise, 'Romco and Juliet' was suggested, but I ibought I was too old for Romeo; I was 36. I would never have considered Lear had it not been for the Bernardy translation. Most French versions of that play — and many of the others, too — are utterly impossible. 'Lear' has never been played at the Comedie-Française.

"After that initial Shakespeare try in 1937 Cocteau wrote; first,

'Les Chevaliers de la Table Ronde' for me and then 'Les Parents Terribles.' I was in many of his other plays and in his films. I've done But at Sete, Yves Gase has aged "King Lear" in a straight-forward manner, letting the meta-shysical sparks fall where they may. In his simple, direct direction, medultered by any procedure in the Bossu' and in 'Cyrane and in this films. of material actually summarizes current photographic fluency in manipulating the processes of the

Market Rising In general, this status bas been accepted only recently by a larger public. Now, photography is defi-nitely where the action is. U.S. collectors have been snapping up contemporary works as well as vintage prints that command eyehrow-rais-ing prices in a burgeoning market. A large number of these works are unearthed in Europe through a complex network of scouts and runners who sniff out the irreplaceable genre scenes, portraits and topographical images recorded by the great photographers of the 19th

Ken Josephson's 'Stockholm' in the Museum of Modern Art's 'Mirrors and Windows' show.

dealers (whose ranks are rapidly Friedlander, gives the show a some-what arbitrary framework, and his position is certain to create energet-center of the American photograexpanding) bas spurred active tradic critical controversy. The expanse pby boom is bearded Washington, D.C., dealer, Harry Lunn, whose suite at the Park Tower Hotel during the June auctions at Christie's and Sotheby's was the scene of Feydeau-like farce as clients and dealers collided in corridors and el-evators on their frantic way to see him. Lunn's tentacles reach every sector of the market. His success in securing the rights to the life work of such American classics as Walker Evans. Robert Frank and Ansel Adams have made him a one-man cartel. This gambit has been been played by Sotheby's — in a rare

Many of the prime pictures in Europe have been swept up by the Americans, Dealer Sean Thackery of San Francisco paid £5,400 for pographical images recorded by the 19th century British photographe great photographers of the 19th pher Roger Fenton's salt print "Nuhian Model Reclining" at the June 27 Christie's sale, a record

move for an auction house -

which last year purchased the en-ure oeuvre of Cecil Beaton.

auction price for a single image; while hotshot collector Sam Wag-staff, part of whose brilliant and ious hoard is now on view ni New York University's Grey Gallery, won an intense bidding war with a fellow American to acquire Fenton's study of a dinosaur skele-ton for £2,900.

European Market

A few prominent Europeans such as Parisian rare-book dealer, Andre Jammes, are active in the game, but great European works continue to migrate across the Atlantic, However, the climate abroad shows evidence that more public exposure for photography is on the way. Last year, Virginia Za-briskie opened a Paris hranch devoted entirely to photography near Beaubourg. The neighboring La Remise du Parc, a gallery owned by American William Burke and his partner Samia Saouma shows all aspects of the medium, including work by young photographers such as New Yorker Robert Mapist for vintage material, Gerard

Levy and Texbraun.
London, too, has its photograph purveyors. Howard Ricketts, the arms and armor dealer on Bond Street, bas long been known for his cache of choice 19th-century prints. Robert Self, in his new Cork Street location concentrating on photography, shows Emerson and Outer-bridge as well as the photo docu-ments that Hamish Fulton makes of his solitary walks. Robert Fraser deals privately, and last April he organized a stunning show of images by Gerald Incansella, a young Tunisian-born photographer now working in Manhattan.

Susan Sontag, in her recent book of essays "On Photography," has said "To collect photographs is to collect the world," Whether one considers a photograph an easy-to-possess history or a method of revealing the inner life, the power of the photographic image - the photograph as a substitute world - has made it a target for the modern art market and a repository for the needs of the contemporary sensibilplethorpe, who exhibited there in july. Two major French sources exacquirers. ity, both for its creators and its

Senator. From time to time, even leadership positions must be reconsidered.

The new Senator is the inevitable result of applying the principle of functionlism to the creation of a totally new automobile. Because its development was not restricted by previous ways of thinking, the new Senator represents a true challenge to existing concepts of what a luxury car should

Function determined the Senator's outer shape. Its purity of line is the result of wind tunnel aerodynamics: sleek and purposeful, with no unnecessary bulges or ornaments to slow passage. Once you see the Senator, you will understand that it simply has to perform the way it does.

And once you get into the Senator, you will be highly impressed with the spaciousness and comfort of its luxurious intenor Within its highly manoeuvrable exterior dimensions, it offers more than generous room for driver, passengers, and luggage

Drive the Senator and you will experience a reassuring combination of handling ease and tenacious roadholding resulting from a completely

new suspension system based on McPherson struts at the front and a fully independent design with double trailing links at the rear. At the same time, the Senator's agility ensures full enjoyment of the superlative perfonnance generated by its free revving, high output 6-cylinder engines.

Adherence to the principle of functionalism has resulted in a precision German automobile that sets new standards for luxury and comfort combined with outstanding performance and roadholding.

You can experience the exciting new Senator for yourself at Opel dealers throughout Europe soon.

All illustrations feature Senator CD.

Pope Paul VI

Giovanni Battista Montini, Pope Paul VI, who died at the age of 80 oo Sunday at his summer residence outside Rome, was the most sophisticated of men. He was a diplomat, by years of training in the Vatican, and this particular mode of action — cautious. restrained, discreet, determined to move toward ultimate goals but at a stately pace - \$ marked the political nature of his papacy. Laymen, especially those who are not Catholic themselves, are necessarily (and wisely) skittish about characterizing the matters of morals and faith in which a pope instructs and guides his flock. But the Vatican and its? estimated 500 million communicants do not exist outside history or current political reality. And Pope Paul's particular impact on the secular life around him is very much worth." thinking about.

It was Pope Paul's fate to become pope not just at a time of enormous political, social, scientific and technological turmoil, but also in the aftermath of a papacy — that of John XXIII — that had abruptly and dramatically altered the course of the church on a broad range of vital subjects. Uoder Pope John the church seemed to leap exuberantly and eveo incautiously into realms of 20th-century life and thought from which it had been coolly and deliberately distant before. Pope Paul VI, inheritor of the change, and a diplomat concerned to keep that change postiive from the church's point of view and under some degree of restraint and control, thus presided over what you might call a measured revolu-

The added degree of internal "democracy" (the word is not precise, but it will have to do) in church affairs, the diplomatic openings of the cburch to the Eastern Orthodox and the Anglican churches and to the secular institutioos of Marxism, the steps toward making more international the highest councils of Rome, the attempt to revitalize the cburch's relationship with the politics of the working class, the modernization of many traditiooal church practices and the elimina-tion of others — all this had been set in

motion when Pope Paul ascended to the papal throne.

That his "success" was limited in accommodating bedrock belief and ecclesiastical practice to the pressures of contemporary life is evident. The loss of the divorce referendum in Italy several years ago marked a drastic setback for the idea of Catholic primacy in the politics of that country - and since that time the Vatican (via the late Aldo Moro, the close friend of Pope Paul) had been reduced to trying to stall off and/or limit the damage of a Communist presence in the government. The rebellion of conservative clergy and parishioners against some of the liturgical and other reforms of the Secood Vatican Council, coupled with the disappointment of Catholies at the other end of the spectrum with the slow and partial nature of much change they regarded as essectial, attest to both the intractable oature of the problems Pope Paul faced and his mixed record in resolving them. We ourselves, speaking from outside the church and, surely, to no one's surprise, would rank as our greatest disappointment Pope Paul's refusal to alter his views on birth

Even so, and despite the fact that other Catholics around the world challenged Pope Paul's views on this, we believe his traditionalism oo birth control and related family and marital concerns came not from any social insensitivity or blindness to human needs, but rather from a profound desire to relate what he took to be the church's fundamental laws and precepts to the turbulent world in which the church must live.

* * *
His impassioned pleas for peace and for social justice and his gestures toward those peoples and churches that bad for so long been ousdie the realm of Vatican cordiality or exchange, were witness to his concern for the life of all. Pope Paul did too much in the eyes of some and too little in the eyes of others. But no one can deny that be maintained the vitality and strength of his church in a time of great social stress,
THE WASHINGTON POST.

This Year's Treasury Raid

Among the leading contenders for the Great Treasury Raid Award of 1978 is the airplane noise reduction bill oow working its way through Congress. Through a unique backdoor device, the bill would divert \$3 billion from the Treasury to the airlines during the next five years. The diversioo would be fairly painless; oo new taxes, oo direct appropriations, oo iocrease in federal spending. The airlines would collect the \$3 billion as part of taxes that already exist but, instead of sending the mooey to Washington, they would spend it themselves on quieter airplanes and airplane eogines.

It's a clever idea — if you happen to own an airline and need money to meet federal noise standards or if you happen to be a member of Coogress and want to give the airlines a helping hand. But it is, nevertheless, a bad idea. Any way you analyze the proposal, it is the imposition of a federal tax for the sole purpose of helping an industry to comply with federal law. Ooce that precedent is set, the possibilities are endless for similar taxes to help other industries meet air, water and noise-pollution standards.

The idea works like this: The airlines would continue to collect an 8 percent tax oo domestic tickets and a 5 percent tax on domestic air freight. They would also collect an . increase departure tax oo passengers leaving! the country. But unlike other tax money, houses of Congress seem about to fall for it.
which goes to the government, this would be:

THE WASHINGTON POST.

different. Each airlines could keep up to 25 percent of the ticket tax, 40 percent of the freight tax and all of the increased departure tax as loog as it was spending that much money on oew and less ooisy equipment.

The key coogressional committees that have approved this scheme had to make two decisions before they even considered it. The first was that the current level of taxes generates more money than ought to be spent on airports and air-safety programs; all of the money raised by these taxes is now earmarked exclusively for those programs. The other is that the airlines need a substantial amount of tederal aid in the next few years. Both decisioos may be logical, but they certainly do oot compel this disingenuous result.

There are more straightforward ways of accomplishing the same thing. Congress could, for instance, keep the existing tax rates and appropriate funds directly to each airline. Or it could cut taxes and let the airlines raise their fares. But if it did the former, voters might not like the idea of a profitable airline's getting, say \$250 millioo a year from the Treasury. If it did the latter, the \$3 billioo would not be tax exempt. It is not surprisiog, therefore, that the airlines and their many friends on Capitol Hill find the scheme attractive. But it is lamentable that both

Harnessing the Weather

Mark Twain's observation that everybody talks about the weather but nobody does anything about it, hasn't been true for 30 years. It was in the mid-1940s that Vinceot J. Schaefer first demonstrated how to seed clouds with dry ice to produce precipitation. Since then innumerable experimenters have found ways to disperse fog, shrink hailstones and otherwise to defend against unfavorable weather. A start has been made, but scientists are sull far from uoderstanding all the forces that determine climatic changes and certainly far from the ability to cootrol them.

It is against this background that we should read the excellent report of the Weather Modification Advisory Board to Secretary of Commerce Juanita Kreps. It recommends a 20-year research and devlopment effort "to learn enough about the atmosphere to modify it, mindfully and

prudeotly" and also improve weather management technologies. It also urges creation of a new organization to lead the effort. It estimated that the program would make possible a 10-30 percent increase in mountain snow accumulations and Midwestern rainfall over the oext decade. By the 1990s, it may be possible to reduce the force of hurricane

winds by 10 to 20 percent. The report stresses the oeed for international cooperation. It ootes that the United States has still not ratified the International Conventioo on the Prohibition of Military or Any Other Hostile Use of Environmental Modificatioo Techniques, an agreement born of a Soviet-U.S. initiative four years ago. Ratification of that coovention would reassure the world that intensified research into weather modification aims at serving the common interests of all societies, oot merely narrow national purposes.

Seventy-Five Years Ago

August 9, 1903 LONDON - The Duchess of Marlborough was

arrested today for exceeding the speed limit between Blenheim Castle and Broughton Castle, as the House of Commons relaxed from a strenuous series of debate on the Motor Car Bill, which was passed last night. The hill, which provides for a maximum speed limit of 20 miles an hour. and imposes penalties for reckless and dangerous driving, has been the subject of much conthe Midwest in November.

Fifty Years Ago August 9, 1928

CHICAGO - George E. Brennan, Democratic chairman of Illinois and leader of the Midwest Democratic group, died early today leaving Democratic presidential candidate Al Smith's forces in a state of shock. Brennan, who was the chief architect of Gov. Smith's Midwest strategy, died as a result of septic poisoning incurred during the extraction of two teeth last week. Brennan's death damages Smith's chances of carrying

Questions on Life in the Test Tube

By Richard A. McCormick

WASHINGTON — The birth of Louise Brown should be a cause of joy and gratitude. Nature (blocked oviducts) has been outwitted and Louise is apparently healthy and normal. Three cheers for Dr. Patrick Steptoe and Dr. Robert Edwards! So what else is new? That is probably the reaction of very many to the "test-tube

baby."

It is, I believe a myopic reaction.

It focuses on benefits and results in narrowly individualistic way. Since we are social human beings, our actions always occur in a context and have social repercussions, implications, and possibly, social costs. No person is an island; nor is any couple, any physician, or any laboratory for that matter.

It is the U.S. way to measure by immediate results. We are an interventionist people. If the elderly become bothersome, disfunctional or dependent, we isolate them in leisure worlds, hospitals for the chronically ill, and homes for the aged. If pregnancy is a nuisance, we end it. Many say the answer to industrial pollution is more technology. The questions come later. Sometimes too late, if our pesticides are carcinogens, have we not missed a turn?

Questions

The in vitro fertilization and emhryo transfer that resulted in the hirth of Louise Brown raises serious social issues and policy questions. To achieve a uterine fix, several ova must be fertilized.

Dr. Steptoe estimated that he had, in his research, gone through roughly 200 fertilized ova. What are these "discards?" Were they mini-abortions? I am not sure. But there is a problem here. After all, the only thing standing between an eight-cell zygote and Louise Brown is a uterine home for nine months.

Being a zygote is part of the his-tory of all of us. We may differ on our evaluation of nascent life at this state, but we should not close our eyes.

Then again, where does embryo transfer stop? With husband and wife? There are many who have no serious moral objection to artificial inseminiation by donor. It has been precticed for years in this country. Can there be any consistent and compelling argument against donor in vitro fertilization for these people? And then there is the host, or surrogate, womb for the malfunctioning uterus, or the third-party ovum for the woman without ovaries, or the unattractive woman. Is it really impossible to imagine a movie star in the future auctioning an ovum for charity? To stem the cries of "Ah, c'mon!" it is well to recall that David Rorvik's book about an allegedly successful cloning of a human being, "In His Image" was on the best-seller list as nonfiction.

A nation of hero worshippers where the family is already under serious assault is not likely to balk at a little sperm and ovum mixing or even a great deal of it. None of this need happen, of course. But today's incredibles are too often tomorrow's headlines. The slope is

slippery in all places.

Furthermore, if in vitro fertilization is done to conquer sterility today, will not donor in vitro reproduction to minimize the risk of generic disease be the next step? After all, everyone wants a healthy baby. At that point the specter of positive eugenics is at our back door with all its enormous problems. For instance, what qualities are to be hred in, what defects screened out? What constitutes the "desirable human being?" And who decides this?

Is It Cricket?

And on and on the questions go. Is it ethically cricket if certain un-known and potentially devastiating hazards of deformity are borne by a prospective and unconsenting child for the benefit of the parents? Daniel Callaghan of the Hastings Center remarked that "the history of medicine is full in instances where things were done unethically hut led to benefits for people. Correct. But are we really better for it? Do post factum results erase the unethical character of what we have done? If they do, we must be ready to accept this in other areas, such as politics.

Just a little moral chicanery can achieve some pretty hig shortcuts. Again, how much embryo transfer was attempted in subhuman pri-mates to minimize these risks?

All of these questions may have What happens if the fetus is discovered by amniocentesis to be defec-uve? Do we simply abort and start over? Is there perhaps a cultural schizophrenia involved in test-tube culturing when over a million legal abortions of mostly healthy preganancies occur annually in the United States? Is it a healthy direction for organized medicine in-creasingly to "treat" the desires of people, especially at a time when primary care and preventive medicine is beyond the reach of so many in this country? Will the introduc-tion of sophisticated and powerful technology into the beginnings of life lead us to view nascent life as a "product," a consumer item, espe cially when this technology in-volves numerous "discards?"

But it should also tell us two more · Richard A. McCormick, S.J., is things. professor of Christian ethics at The

Energy Needs in Two Worlds

By Stuart Van Dyke Jr.

real a fact to be changed overnight

by right-thinking people. It is not

their cities were functioning su-

perbly before the car was invented.

Furthermore, the United States has

had a 500 percent population' growth in the last 100 years, far greater than that experienced by

any European country, and these 160 million Europeans have accom-

eater intelligence on the part of

would be a serious sacrifice.

THICAGO — There is a good deal of talk about the excessive and wasteful use of energy in the United States.

Europeans are especially critical, telling us that our average energy consumption is two of three times as great as theirs.

Before we agree to cut our sup-plies in half, we should examine this comparison. Without denying the necessity for energy conservation, or that there is too much waste, there are nevertheless a. number of good reasons why the average American needs more fuel than the average European.

Climate

To begin with, the most hasic cause, the climate of Western Europe, is a good deal more hospitable to human habitation than our own. Since Paris or London rarely experience freezing weather, and since the summers are generally tralized heating and air-condition-

ing is restricted There is no question on the other hand that civilized living in the northern half of the United States requires an effective system of artificial warmth. Are the people of Buffalo really expected to use the same amount of fuel as the people of Amsterdam? Stockholm might be a better example, but the fact is, a much greater percentage of our population lives in this cold climatte zone than is the case in Western Europe.

Just as U.S. winters are colder, U.S. summers are hotter, and to take back the great advances in air-

conditioning that have made life livelihood and emotional satisfac-more productive and agreeable tion of most people in the United tion of most people in the United States depend on smooth and easy Next, the often derided U.S. decommunication over an area of ap-proximatly 3 million square miles. Would it be possible to maintain pendence on the car is simply too this communication with the same amount of fuel the West Germans use over their 94,000 square miles? Unfortunately, without a continued Europeans that makes them less dependent, but merely the fact that supply of cheap energy our civiliza-tion will flounder.

It would be an error to believe that by operating on this scale we are recklessly extravagant. We have neither the population density of Europe nor the thousand-year history that has made the European countries relatively self-sufficient economically and intellectually. As a result, California and Midwestern farmers must look much farther afield for their markets than their French or West German counterparts. While the Napolitano can buy his car from Turin, the Texan student from Birmingham goes to Oxford, the bright one from Minneapolis goes to Harvard.

Although an economy our size requires a lot of energy, it is used for the productive purpose of ameliorating our standard of living, which, if anything, is now lower than that of many Europeans. It is not difficult to foresee that if our supplies were cut to the level of Europe's depression and civil disorder would ensue. It is obvious that we should not be the only ones worried about these consequences: The security of Western Europe depends on a stronger, unified and determined United States.

Runs Risk

Without adequate energy, how-ever, the United States runs the risk of becoming poor, backward and dislocated, not to mention cold. For Europe's sake, as well as our own, we should not be intimidated by this comparison.

These remarks point out that we have legitimate requirements that must be recognized. They are not meant to free Americans from the problem of conserving fuel, for that vill probably be a matter about which we have no choice. Showing that we need energy is one thing. assuring an uninterrupted supply is another. No matter how that can be achieved, it will surely need the cooperation of our friends across the

Political Bite of U.S. Inflation

7ASHINGTON — The trail once accelerate the trail home once again. But far more i the form of political bite than c

soaring prices.
For the inflationary condition unsettles the center, gives the initiantive to the right, and puts liberal on the defensive. It thus shatter the fabric of national consensus.

Inflation is political dynamit because of its impact on that quir tessential figure of the majority the middle-class taxpayer with at notal income ranging from \$15,00 to \$30,000. Most middle-incom people earn higher salaries as a re sult of inflation. Their houses an other property appreciate - some times enormously.

But the increase in income tend to lag behind the rise in prices Nevertheless, bigger taxes have to be paid because of entry into higher bracket. Houses and other property usually cannot be sold. But far higher property taxes have to be paid because of the increaser.

The upshot is a decline in stand: ard of living, despite an ostensial. rise in income. The sense of having been duped, cheated and gulled the keenest psychological conse.
quence of inflation — is thus accomplished. It yields, on the partity, feelings of hostility toward gov, ernment and most of its works, es

pecially taxes.

In that climate, the ideologue and demogogues of the right acquire heavy clont. A doctrinain. free-enterpriser, former Secretar, of the Treasury William Simon, i now taken seriously as a spokes man for business. The dollar closed the European day around 1.9869 DM, down from 2,0084 DM yesterday. It also ended the day at a record low of 1.6940 Swiss francs, down from 1.7063 vesterday.

Below Intraday High

Gold advanced to a record \$206.45 an ounce at the close of European dealings, up nearly \$3 from yesterday. The closing price was somewhat below gold's all-time intraday high, however, which was about \$207.35 near the opening of European trading last Tuesday.

There was no particular news to-day to which the dollar's decline could be attributed. Indeed, some favorable sentiment toward the curmacy developed late in the day when the White House annouoced Egypt and Israel had agreed to a stimulate its economy. But with new summit meeting at Camp David, but dealers said a tentative firming tendency in the dollar was overwhelmed by commercial sell orders, many coming from the United States,

"They're hitting all our bids," a Kiichi Miyazawa, director gener-dealer here remarked, indicating al of Japan's Economic Planning that U.S. banks were selling dollars and buying marks at whatever rate the European bank said it was will-: ing to buy the U.S. currency. Trad-

Bonn economic summit, began a economic growth during the year, a new upward movement about a supplementary budget to boost dogains by the Swiss franc and the yen. Traders had been hesitant to buy marks until Chancellor Helmut Schmidt disclosed the details of a summit pledge to deploy new measures to stimulate the West German economy, fearing that the plans might prove both inflationary and difficult to finance.

Impact Is Diagnosed

These fears were apparently overdone, however. The stimulative impact of the new proposals, which included tax cuts in 1979 and 1980 and a modest increase in govern lysts, Moreover, Finance Minister Hans Matthoefer said today the borrowing requirement of West Germany's federal and state govtraments in 1978 would total about is on the acquisition trail. It is raising more than \$200 million from the Singapore and Kuala Lumpur the revision was attributed to expectations of higher tax revenues.

The latest issue of World Figan- ever sought here. cal Markets, published by Morgan Guaranty Trust, helped to explain the attraction of the mark in the current circumstances. It pointed out that recent strong advances by suited in trade-weighted, inflation-adjusted gains of 24.3 and 23.1 per-cent, respectively, for those curren-sies against the dollar over the 12 the yen and the Swiss franc had recies against the dollar over the 12 months ended July. In cootrast the mark actually declined 3.3 perceot gainst the dollar on the same

To Terms of IMF Credit

Government Delays Announcing Details

LIMA. Aug. 8 (NYT) — The loternational Mooetary Fund and Peru's central bank have reached agreement oo terms of a stand-hy credit arrangement after 16 months of oegotiations.

The subject is so delicate here that financial aides have not yet of-ficially announced the agreement and they say privately that they intend to put it off till the last possi-ble moment. However, a telex has been sent to the IMF in Washingfloor level in the arrangement. In Brussels, bankers were expecting a large increase in the discount rate agreed to in oegotiations in Lima agreed to in oegotiations in Lima during July are now government policy. Formal approval is sched-uled for mid-September at the next IMF board meeting.

The reluctance to acknowledge extent the guilder, have been under the deal seems to reflect more than downward pressure ever since EEC the military government's penchant heads of government announced at for secrecy. It also has to do with a summit in Bremen early last, the seriousness of the economic remonth plans for a oew, enlarged cession — the worst ever — and the appearance of a constituent assem-bly, elected on June 18 and formally installed July 28.

In theory, the assembly's job is Some foreign-exchange experts be-lieve such a scheme can not be im-tution, but already it has indicated that it is going to play a part, possijustment of the parity of the mark hily a major ooe, io running the against such currencies as the Bel-country. It has, for instance, appointed special commissions to deal with strikes and these bodies may clash with the labor ministry. politicians say.

The agreement with the IMF will undoubtedly force further austerity and hardship on Peru's lower and middle classes, already battered by the recession. The idea, as with all the fund's "stabilization" programs, is to put some order back into the country's public finances and to reduce inflation — currently running at around 80 percent on an annual basis — to manageable lev-

The main features of the arrange ment, according to finance officials here, are:

 Unfinanced "bank" credit to the central government is to be kept to 65 billion soles (about \$462.5 million).

• Interest rates, which are legal-ly controlled, will increase by an average of 12 percent. The prime cratic Party have joined labor rate to borrowers will be about 35 unions and opposition parties in percent on an annual basis. Treasury bonds will carry tax-free coupons of 31.5 percent, which the IMF wants increased again later in

sol against the dollar will be speeded up to about 205 by the end of the year. The current rate is 154. · Credit to the private sector will be cut, but not as sharply as was originally feared. This means Mr. Fukuda's government op-poses a tax cut because of shortages a recessionary market, should at least be able to borrow mooey, al-

though at high rates.

Raising \$200 Million in Asian Markets

ment spending, has been diagnosed Sime Darby Rides the Acquisition Trail

largest conglomerate, Sime Darby, is on the acquisitioo trail. It is raischases — the largest corporate loan

As was to be expected, the loan was oversubscribed, with subscrip-tions totaliog \$260 million to \$280 million from about 30 banks. However, the loan was oot too well received either in Singapore or Ku-

The business community is aflutter, with everyone guessing about Sime's intentions. Its chairman, Tun Tan Siew Sin, says that, because the group is negotiating

discuss his broad goals. In 1977, half of Sime's \$61-milof yen, Swiss francs and pounds in secret days into marks as well as out of dollars, dealers said. As a rewants to make the group, which produces palm oil, rubber, cocoa and tea, less vulnerable to cyclical fluctuations in commodity prices by going beyond production and into processing operations.

He took over after a boardroom battle io early 1977 that resulted in the replacement of his predecessor and three British directors by widely known husiness figures from Malaysia, Singapore and the Philippines. Since then the group has emharked on a major expansion of its pulm-oil refining capacity.

But not much progress has been made in rubber, which is now the group's second biggest commodity, because of the switch of acreage to palm oil and cocoa, with their higher profit potential. As Tun Tan says, the main obstacle is the lack of technical ability, which he wants to acquire hy buying companies in Europe or Australia with the proper technological background. "Joint ventures don't really suit Sime: we are big enough to go it alone." Tun Tan said in an inter-

KUALA LUMPUR, Malaysia, view, "although we may have to opt Aug. 8 (NYT) — Southeast Asia's for collaboration if there is no largest conglomerate, Sime Darby, alternative."

The Malaysian government bolds 27 percent of the country's total capital through state-owned He is also pulliog out of Europe,

which apparently does not suit his broad strategy. Sime has, for instance, sold Marryat & Scott, its once wholly-owned U.K. subsidiary that makes elevators and escalators. But at the same time it has consolidated control over a Singapore engineering company by huy-ing out other shareholders, suggest-ing that it is looking worldwide in search of profits.

In fact, this is what the boardroom battle that hrought Tun Tan to power was about. The argument pressed by regional shareholders was that since the bulk of the group's ownership, assets and profits came from within the region. Sime ought to deploy its talents and resources primarily to the region's benefit regioo's benefit.

Now, 60 percent of the holding company's \$35.72 million in capital seeds will be used in the first insowned by Malaysian entities and 30 percent hy Singapore investors. But the company is still incorporated in Britain, although this is expected to change soon. The head-io three subsidiaries to another quarters has been moved from Singapore to Kuala Lumpur. The Brinsh are in a minority on the board, but the executive committee,

companies, a fact that prompted Keith Bright, the British chief executive who resigned following last year's differences, to describe the bid for board seats as a gambit for "backdoor nationalization." Malaysia makes no secret of its desire to gain a share in the companies operating here — the target is 70 percent by 1980.

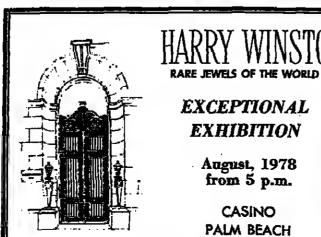

Because of this background, and the fact that Tun Tan is a former Malaysian finance minister, there have been suggestions that Sime may be acting as a proxy for the Malaysian Government. Market rumors thus linked Sime's loan op-eration to a possible takeover bid for Guthrie Corp., a British-owned plantation company in which Sime holds a small stake.

When the loan agreements are

wholly-owned subsidiary. What still remains a mystery is what Sime will do with the money that finally comes back into its which oversees day-to-day opera-tions, is still wholly British.

pockets as a result of the transfer arrangements.

National Opposes Texas Airlines Bid

National Airlines has filed a formal charge with the Civil Aeronautics Board accusing Texas International Airlines of violating federal securities laws in its takeover bid for National It urges the CAB to defect indefinitely any action on Texas International's application to assume cootrol of National and to order a broad review of competitive and public-in-terest questions if any CAB hearing on the Texas International control application ultimately is held. This would include, National says, an examination of reports that Texas Internanooal plans to use foreign capital to acquire control of National. The petition also charges that Texas International's parent firm, Jet Capital, is an investment company within the meaning of the 1940 Investment Company Act and that this could limit its legal ability to acquire National Airlines shares.

Aeritalia Sees Gain in Boeing Pact Aeritalia expects to receive 2 urillion lire (about \$2.4 billioo) over 10 years in its joint venture with

By Joseph Collins

LONDON, Aug. 8 (NYT) - The

wealthy Thomson empire, which oumbers The Times of London

among scores of other properties,

plans to move its operating base

from Britain to Canada, allowing it

greater opportunities to invest prof-its from North Sea oil.

The reorganization is iotended to establish a Canadian holding company free of British monopolies leg-

islation, foreign-exchange cootrols and dividend limitation. The com-pany, to be called the International

Thomson Organization, will be

merged with the Thomsoo Organi-

zation, the main British company.

The change, it is expected, will be formally approved at an extraordi-

nary general meeting next month.

The Thomson Organization, es-tablished by Canadian puhlisher Roy Thomson (later Lord Thom-son of Fleet) in 1959, said its main

investments will remain in Britain. It has a £100-million investment

program and a £70,3-million oil ex-

ploration and development project

take over the Thomson family in-

terests in the North Sea oilfields,

Piper and Claymore, which are highly lucrative although not yet at

peak production. In Britain, the company's publishing interests are

so large that expansion in that di-rection would certainly run afoul of the Monopolies Commission.

Thomson owns the nation's Yellow

Pages, dozens of regional newspa-

pers and other publications. It also has sizable holdings in transpor-

taion, taxis and the travel and air-

Britain. The new Canadian company will

Boeing to build the 767 and 777 aircraft. The contract, which gives Aeritalia a share of between 15-to-20 percent in production of the mid-size 767 and 777 planes, will be signed oext week, says Franco Viez-zoli, head of sinte-owned Finmeccanica, the airline's parent company. The 2-trillion-lire figure is the value of payments for the first 1,000 planes.

Plessey Sees Uptrend

Plessey's performance is expected to continue on an uptrend in the current fiscal year ending March 31, says chairman Sir John Clark, "With a record order book of £700 million, our sales prospects in the current year are promising," he explains. The company is taking "vigorous action" over problems in the Garrard consumer electronics subsidiary, which posted a loss of £5.6 million in 1977-78, including a large had debt. Continuing Garrard losses will depress results, especially in the first half of the current year, but thereafter we expect overall per-formance and profitability to show improvement on the growth pattern of last year," he says.

Kenoeth Thomson, the second

Lord Thomson, has undertaken to

keep The Times and The Suoday

Times going. But it is doubtful whether he derives the same per-sonal satisfaction from them that

The Thomson family owns about

80 percent of the Thomson Organi-

zauon shares. The company, which

has a stock market capitalization value of about £380 million, fore-

casts earnings this year will be about £45 million, with £31 million

The outside shareholders — 7,500 residents of Britain — will

Executive Directors of the International Banking Group from around the world are: John Dunlop, Joseph Galazka, James Hildebrand, Warren Hutchins, Milan Kerno, Harry Martin, Richard Miles, Joseph Oliver, Richard Reibman, Gerard Troncin and Stephen Wilberding.

We grewat a record rate last year. Doing things no other banking institution can do.

Thlike any other banking institution in the world, Othe Merrill Lynch International Banking Group offers commercial and investment banking services in all the international capital markets outside the U.S., plus direct access to long-term capital in the U.S.

This unique international banking capability, coupled with Merrill Lynch's worldwide securities distribution and trading power, was no doubt decisive in helping the Group achieve its solid record of growth in 1977.

International public issues: \$2.8 billion

International public issues managed or co-managed by Merrill Lynch amounted to \$2.8 billion in 1977 versus \$2.2 billion in 1976, an increase of 25%.

The total financing Merrill Lynch helped arrange for corporate or governmental clients in the U.S., Canada and worldwide amounted to over \$30 billion in 1977.

Syndicated bank loans: \$1.3 billion

Supported by a substantial increase in capital resources devoted to banking, we managed or co-managed \$1.3 billion in syndicated bank loans during 1977, a notable increase over the \$140 million of managerships in 1976. Commercial loans to corporate and governmental clients grew from \$63 million in 1976 to \$204 million at year-end 1977.

Eurodollar securities trading: \$3.25 billion

In 1977, Merrill Lynch's International Banking Group trading volume in the Eurobond secondary markets was 62% greater than 1976.

Mergers and acquisitions

The Group's contacts make it an important source of merger and acquisition candidates around the globe. Merrill Lynch assisted in 47 projects involving mergers, acquisitions, divestitures or tender offers in 1977.

Merrill Lynch International & Co., Merrill Lynch International Bank Ltd., Merrill Lynch Pierce Fenner & Smith Inc., Merrill Lynch Government Securities Inc., and Merrill Lynch Royal Securities Ltd. are members of the Merrill Lynch & Co., Inc. group of companies. Affiliates in: Amsterdam, Athens, Bahrain, Barcelona, Beirut, Brussels, Buenos Aires, Cannes, Caracas, Dubai, Disseldorf, Frankfurt, Geneva, Hamburg, Hong Kong, Kuwait, London, Lugano, Madrid, Manila, Milan, Montevideo, Panama City, Paris, Rome, Rotterdam, São Paulo, Seoul. Singapore, Sydney, Taipei, Tol yo, Vienna, Zurich, Joint venture in Tehran-Iran Financial Services Co.

BOOKS

William Faulkner Toward Yoknapataxpha and Beyond By Cleanth Brooks. Yale University. 456 pp. \$17.50.

Reviewed by Jonathan Yardley

LEANTH Brook's oew book is a companion volume to his widely and deservedly admired "William Faulkner: The Yoknapa-tawpha Country," first published 15 years ago. In the great flood of Faulkner criticism of the past 30 years or so that first book stands as a landmark; its analysis of the great oovels sel in Yoknapatawpha County, Faulkner's fictional "postage stamp of native soil," has yet to be matched.

"William Faulkner: Toward

Yoknapatawpha and Beyood" examines the rather meager body of writing that Faulkner set outside Yoknapatawpha: poetry, occasional prose and five novels. The book will be of less general interest than the first because the material it discusses is less interesting. But as Brooks correctly observes, "However limited, however perfunctory, the works of a man of genius are rarely completely unrewarding."
And because the critic at work here is Cleanth Brooks, a scholar of formidable powers and a graceful writer, the book is intrinsically interesting.

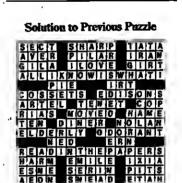

Its greatest value lies in its discussion of Faulkner's artistic metamorphosis. His earliest influences, as Brooks traces them, were romantics: Swinburne, Mallarme, Rostand. But then he began to read es-sentially anti-romantic writers — Housman, Eliot, Joyce, Cabell and as be came under their influ-ence be found his own romanticism challenged. Brooks correctly argues that be remained o romantie throughout his career, and that much of the fine tension in his work derives from the conflict between his romantic impulses and the bostility of the 20th century to them: ". . . in spite of bis early fas-cination with the innovating writers of the 20th century, his growth to artistic maturity is largely the story of his taming of his romantic tend-encies and his bringing them into fruitful relation with the counterforces emanating from the oew litcrature of the 20th century."

In Faulkner's apprenticeship Brooks locates two conflicts: between the romantic and the realistic and between the regional and the universal. He was able to resolve them both: the first by permitting tension to exist, the secood by finding universal themes within the re-gional setting in which be found his artistic home. Finding that bome was not easy,

and Faulkner did a great deal of mediocre writing before he settled down to Yokoapatawpha io "Sartoris." Of the apprentice work, ooly his first oovel, "Soldier's Pay," has genuine merit; considering how much it has been derided, it is refreshing to find Brooks accurately assessing it as an impressive first novel. He has few kind words for the poetry, however, and even few-er for Faulkner's second novel, "Mosquitoes."

After Faulkner settled into Yokoapatawpha, he moved outside it in only three novels. The best of them is "The Wild Palms." "Pylon." as Brooks notes, contains some fine writing but overall is only mediocre. As for "A Fable," it is a strained altempt at a grand thematie statement; some Faulkner critics have worked themselves into elaborate contortions trying to fiod merit in it, but Brooks finds almost cone and he is right.
The rest of "William Faulkner:

Toward Yokoapatawpha and Beyond consists of a thoughtful essay on Faulkner's concepts of

time and history and a number of lengthy appendices in which Brooks expands upon points he has made in the texts of this volume and the first one; his discussion of Faulkner's views toward the Southern planter class is especially use-

There is no gainsaying that this book, fine as it is, will be of interest primarily to Faulkner scholars. But the general reader will find much of value in its early chapter, no one has written so penetratingly as Brooks about the sources of Faulkner's art. It is an art so large and profound that every aspect of it deserves the most thoughtful, scrupulous and imaginative study; that is what Cleanth Brooks provides.

U.S. May Raise Duty-Free Limit

WASHINGTON, Aug. 8 (AP) U.S. travelers returning from abroad would be able to bring in purchases valoed up to \$300 without paying duty under compromise legislation approved yesterday by House-Senale conferees. The present limit is \$100 per person.

For those bringing back free-port purchases from U.S. insular posses-sions, the limit would be \$600 mstead of the present \$200.

Sopporters of the change said the increase reflects reduced purchasing power of the dollar. The bill recoociles versions passed earlier by the House and Senate. It now goes back to each chamber for approval:

BRIDGE

By Alan Truscott

The bidding on the diagramed deal occds some explanation. South in lourth seat opened one heart, and beard his partner respond two clubs. This was the Drury conven-tion, promising heart support and interest in game. Most South players would sign off to indicate a minimum opening, but South was in a bullish mood and took a shot at four hearts. His prospects im-proved when West chose to lead a club, destroying one of the poten-tial tricks for the delense. The club nine woo in the closed

hand, and the ace and king of trumps were cashed. This collected the queen, and South had solved two of his problems. He led a dia-mond to dummy's king, and East took the ace and led a club. South took the ace, ruffed the

club jack, and had to break the spade suit. He led to the ten, losing to the jack, and was forced to ruff and diamond return. In order to lead a secood spade from the dummy, he bad to use a trump entry, and when the spade king lost to the ace, another diamond forced out his last trump, and he was down two.

In the replay, the same contract was reached, and West led a diamond, apparently the right start for the defense. But when East won, he

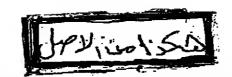

shifted to a low spade, and it is hard to blame him. But this was disastrous for the defense. West woo with the jack and led another diamond, ruffed by declarer. Trumps were drawn ending in the dummy and the spade lead to the ten established the suit.

The last spade in the closed hand provided discard for a club in duminy, and the contract was home for the loss of one diamood trick and two spade tricks.

Seaver Loses Again

Braves Stifle Reds, 5-3

CINCINNATI, Aug. 8 (UPI) — Mickey Mahler and Gene Garber stifled Cincinnati on six hits while Rod Gilbreath and Dale Murphy each drive in two runs last night as Atlanta pinned a 5-3 defeat on the Reds. The Braves handed Tom Scaver his seventh loss in nine outings since his no-hitter June 16.
The Reds, in first place in the National League West overnight.

dropped a half game behind the idle San Francisco Giants. Mahler (4-5) allowed five hits and two runs in six innings. Garber wild-pitched the Reds' second run across — with Pete Rose at hat — after Mahler pitched to the first two batters in the seventh. Garber. who ended Rose's 44-game hitting streak last week in Atlanta by striking him out in the ninth inning. then retired him on a long fly to center. The sidearmer went on to his 18th save.

Seaver (11-10) gave up six hits and three earned runs in seven inn-

leff Burroughs opened the Ailanin second with a walk and went to second on Joe Nolan's single List of Asijing through the box. A Seaver wild pitch allowed both runners to advance and Burroughs scored when another Seaver delivery eluded catcher Vic Correll for a passed hall. Gilbreath's sacrifice fly scored

Murphy tripled after Nolan's one-out walk in the fourth to make it 3-0 and Gilbreath's suicide squeeze bunt to the right side drove in Murphy.

The Reds got a run in the fourth on a bases-loaded sacrifice fly by Ken Henderson, one in the seventh

Control of the Reds got a run in the fourth on a bases-loaded sacrifice fly by Frank Taveras' glove.

Dodgers 3, Padres 1 on Garber's wild pitch and one in the eighth on George Foster's 26th

Cincinnati scored in the seventh after Dan Driessen and Correll opened with consecutive singles. Garber replaced Mahler and got pinch-hitter Mike Lum to ground into a doubte play, moving Driessen to third before he confronted Rose, who ended the night 0-for-4.

Cardinals 6, Phillies 3

At St. Louis, George Hendrick homered in the sixth inning and hit a two-run double during a five-run seventh as St. Louis defeated Phila-delphia, 6-3. Hendrick reduced the Philadelphia lead to 3-1 in the sixth with his 12th homer. His double in the seventh capped the inning that gave Randy Lerch his seventh loss

Cubs 5, Pirates 4

At Chicago, Bill Buckner's tworun single capped a five-run fourth
inning that gave Chicago a 5-4 victory over Pittsburgh. Mike Vail
launehed the big fourth with a single and one out later Manny Trillo
also singled. Danny Joboson
walked and Vail scored oo a balk
by starter Jerry Reuss Tim by starter Jerry Reuss. Tim Blackwell walked to refill the bases and Ed Whitson replaced Reuss. Pincb-hitter Larry Büttner grounded out, scoring Trillo, and walks to

Dodgers 3, Padres 1

At Los Angeles. Lee Lacy hit a two-run homer and Joe Ferguson added a solo shot to support the six-hit pitching of Tommy John and help Los Angeles to a 3-1 triumph over San Diego. Third-place Los Angeles closed within two games of division-leading San Francisco in the National League

Blue Jays 2, Orioles 1

In the American League, at Toronto, Jim Clancy fired a fourhitter and Alan Ashby's seventh-in-ning single produced the winning run as Toronto defeated Baltimore, 2-1. John Mayberry drew a leadoff walk, his second of the game, in the seventh and was sacrificed to second by Al Woods. Ashby then sent a bouncer past Lee May, playing first base for the first time since the opening week of the season.

At Oakland, Calif., veteran righthander Steve Renko pitched a four-hitter as Oakland beat California, 1-0, and moved within three games of first place in the American League West. Renko struck out five and walked two. His only tough inning was the third.

Mariners 6, Twins 5

At Bloomington, Minn., pineb Ivan DeJesus and Rodney Scott runner Julio Cruz raced home from forced in another run before third base on a wild pitch by Stan

Kansas City catcher Darrell Porter is too late as he tags runner Bob Molinaro during game Monday with Chicago White Sox.

Perzanowski with two out in the 14tb inning to give Seattle a 6-5 vic-tory over Minnesota. Perzanowski walked pinch-hitter Bruce Bocbte to open the 14th. Cruz was inserted as a pineb runner and was sacri-ficed to second by Craig Reynolds. Ruppert Jones' deep fly to right al-lowed Cruz to take third before Perzanowski uncorked the wild

White Sox 5, Royals 3

At Kansas City, Mo., Lamar Johnson hit a three-run bomer off Kansas City relief ace Al Hrabosky to lift Chicago to a 5-3 vietory, Kansas City starter Dennis Leonard turned over a 3-2 lead to Hrabosky with one out and two on in the seventh. One out later, Johnson lasbed Hrabosky's first pitch 400 feet over the left field fence.

Reminder to Steinbrenner

Torrez Takes Revenge on N.Y. From Boston Mound

By Joseph Durso

NEW YORK, Aug. 8 (NYT) -Revenge is not the noblest of human motives, but it can be one minimal mouves, but it can be one of the sweetest. And, although Mike Torrez of the Boston Red Sox insists with a pearly smile that "I'm not mad at anybody," there he is — gleefully driving every nail he can mot the New York Yankees' coffin,

Now why would anybody want to do that to a nice, generous man like George Steinbrenner? After all, game. Then when Mike decided to complete-game victories over the

May Rolls

init

become a free agent, George of-fered to triple his salary. And oo top of all that, Mike pocketed 25

Los Angeles Dodgers in the World Series,

So, pass the nails while Torrez

When he delivers that line, Tor-

Pass the Nails

No wonder he's not mad at any-body. But still, Mike Torrez rea-sons like this: The Red Sox, who did not win the World Series last year, were happy to spring for seven years at almost \$360,000 a year. George was paying Torrez some-thing like \$90,000 to pitch for the Yankees last season, which was about \$5,000 every time he won a

Tiger Fidrych Is Out for Season

DETROIT, Aug. 8 (UPI) — Mark "The Bird" Fidrych, plagued by injuries since his sensational 1976 rookie year, will be out for the rest of the season, the Detroit Tigers announced today.

Jim Campbell, the general manager, said that doctors advised that Fidrych, a right-hander sidelined since mid-April with tendinitis in his ight arm, should rest the remainder of the year.

the arm, should rest the remainder of the year.

Campbell said that Fidrych, who posted a 19-9 record to win the Americal \$220,000 a year. Andy Mesican League mokie of the year award in 1976, will be placed on the 60-day sersmith at \$330,000 and Rich Gosemergency disabled list, keeping him out of action for the rest of the season. He also said Fidrych would not play winter hall, meaning the

enter de la companya del companya de la companya del companya de la companya de l

big ones for being on the team that won the World Series. hammers away. Not really mad. Just reminding George of the big

one that got away.
Sometimes, Torrez hammers away at the memory right under Steinbrenner's oose, as be did last Thursday when be pitched the Red Sox to their 8-1 victory over the Yankees before 53,379 customers in the Bronx. He allowed his old teammates six singles and one unearned run before rain ended the game in the seventh inning.

Sometimes, he does it in Fenway Park, where he will pitch against the Cleveland Indians tonight while the Yankees are grappling with the mean Milwaukee Brewers in the home that Torrez left.

But wherever he does it, he remembers that the Yankees had their chance and spurned it. Not only that, but they also spent big to found that the resident capitalist sage at \$458,000. The Yankees need pitching. You pay your money, you

take your eboice. When I'm sitting in the hull pen in Yankee Stadium sometime, Torrez was saying the other day, "1 hear a lot of shouts of, You traitor. you traitor. People lean over the Sox is Bob Bailey, who hit a home railing and call: Why did you run last Thursday to help Torrez leave? and I say: 'Because George didn't think I was worth it.'

"It's hard to say what was in George's mind at the time. I know that Reggie Jacksoo and Lou Pi-

"We had this talk in Las Vegas last winter just before the free-played 16 seasons and hit 190 home agent draft, and George said: runs for Pittsburgh, Los Angeles. agent draft, and George said: runs for Pittsburgh, Los Angeles, 'Mike, we want to keep you, but Cincinnati and Montreal But this there's only so much money. And I was the first time I ever got into a really can't blame you if you can game in Yankee Stadium, and, in get more someplace else.' He also my second time at bat, I got bold of told me: 'You're going to be a one. I can't tell you what a thrill it Yankee.' But it just didn't happen was to see it go so high and far." I only heard from them one time. I

When he delivers that line, Torrez pauses to let it sink in. He is tall, dark, handsome, 6 feet 5 inches in beight with Hollywood looks and bearing. He doesn't even sound boastful when he remembers that he has won 66 games in the Ameri-can League in 312 years, more than anybody except Jim Palmer of the Baltimore Orioles. He doesn't even sound particularly vengeful when he notices that the Red Sox are running far in front of the Yankees.

He just sort of licks his chops.

Torrez is a shining example of baseball's traffic flow in the era of the free agent. He started with the St. Louis Cardinals in 1967, was traded to the Montreal Expos four years later, then to the Orioles three years after that. He won 20 games in 1975, then was sent to Oakland in the deal that sent Reggie Jackson to Baltimore. Then he went to the Yankees a year ago last April and

That's when he elected to play out his option and test George's hankroll. After all, the Yankees were outbidding everybody else in the auction market. But this time tbey underhid the market and Torrez became a historical oddity: the hig one who got away.

One of his teammates on the Red run last Thursday to help Torrez heat the Yankees. It was this sweet,

The Soccer Scene

What Tomorrow May Bring. . .

By Rob Hughes

LONDON, Aug. 8 (IHT) - The hand of fate is, at times, dealt as inequably to the gods of sport as to the rest of us. Roberto Rivelino of Brazil and Berti Vogts of West Germany prove the point: Rivelino, 32, being made a millionaire by transporting his skills to Arabia, while Vogts, a year younger, has nowhere to go except the hospital where doctors wait to decide if his shattered leg can be repaired to save his

How quickly has the wbeel turned. Roberto and Berti were almost equal two months ago when, as national captains with almost a century of internationals behind them, they began the World Cup as favorites. In the event, neither team was to win, though neither was beaten in a game.

Contrast in Performance

Yet, even there, fortune fluetuat-ed. Rivelino's World Cup was impoverished: He managed only one full game — the first match against Sweden — and then, according to how you interpreted the word of Brazilian officials, was eiword of Brazinan officials, was en-ther injured, generally unfit or dropped throughout the rest of the tournament. Vogts, meanwhile, was the extreme professional, working terrier-like and doggedly within a German team which was unrespon-sive to its leader. sive to its leader.

sive to its leader.

And now? Vogts, the left back of Borussia Moeoebengladbaeh, broke his right leg in three places in the first cup mateb of the oew season last Saturday and the bospital bulletin was bleak: "The injury is extremely complicated. We can only wait and hope he will be able to play again." But Vogts, who had collided with Erich Miss of Wuppertal SV late in a game his side was comfortably winning, had side was comfortably winning, had intended this to be his last season before he becomes a youth coach with the West German National Association.

Courted by Princes

Rivelino, meanwhile, a man whose career had always been more Individualistic and spectacular, was trading his once magnificent left foot to the princes of Saudi Arabia. He flew by Concorde to Riyadh last week to sign for el-Helal on a two-year contract worth between \$5 million and \$9 millioo. He and his wife were driven to the club in a Rolls Royce, met the club's Brazilian coach, Paulo Amaral, and agreed to return next month to perform. By that time, it is anticipated from Rio de Janeiro, he could be joined by such colleagues, past and present, as Zico, Paulo Cesar and even Claudio Coutinho, the Brazilian World Cup coach who was being hurned in 'effigy' during Brazil's early grouping performanees in Argentina.

Meanwhile, too, the Arahs must sort out a compensatory transfer fee with Flummense, Rivelino's club io Rio which signed him on a renewed and lucrative two-year contract shortly before the World

In his previous two World Cups, Rivelino had been mean, moody hut also magnificent. Johan Cruyff run that set up a second score as described him as "having only the New York Giants beat the left foot — but he can use that foot Cleveland Browns, 21-7, last night like a hand." No one has ever in the opening National Foothall struck free-kieks so fiercely or so straight and, when his interest was teams. riding high, few could switch the point of attacking play so dramati-

We have not, bowever, seen that Rivelino for some time. He began World Cup training last February

Major League

Philodelphia (Christeneon 9-18 and Lonborg 7-9) of 31, Louis (Vuckovich 8-9 and Sruno 1-9), 2 New York (Sruherf 2-5) of Mantreal (Fryman

with a large, bloated midrift. He trained reluctantly, as a tired old boxer being hauled toward one last peak. He never reached it. In Argentina, his ankle was suspect, hut he also argued about tactics with his manager and his populari-ty with the team never amounted to anything like the weight of reputation he carries.

But, then, the Arabs are in the market at the moment for reputa-tion. Witness the signing also last week, of Dave Maekay, the famous old warhorse of the Tottenham Hotspur glory years of the early sixtes. Manager of Waisall, a strug-gling third divison financial drain, he abruptly left when Arabic Sport-ing Club of Kuwaii offered him \$80,000 a year to look after its players, who perform just 17 matebes each season in a multi-million dollar stadium.

Mackay was the bravest man 1 ever saw on a soccer pitch. He three times defied broken limbs to return to Spurs and Scottish national teams, but, rather than a qualified coach or strategic thinker about the game, he always was, and remains now, a self-confessed instinctive man of action. True, be managed Derby County to the English Na-tional Championship, but that was on the basis of a side left him by Brian Clough and augmented by his strong point - an eye to spot and sign outstanding players. How much of that grows in the desert?.

not always beholden to a man's output today. Even the contrast between the studious Vogts and the gifted Rivelino does not underline this quite so poignantly as the for-tunes of the Watson brothers. Peter and David Watson both

began soccer as tough, aggressive center-halves. David, the younger, is safety instalted as England's first choice defender and lives in a buge house in Manchester, where the city club pays him 500 a week plus 100 for each point the team wins. Brother Peter, on the other hand, despite a talent which family and experts maintain was at least equal to David's, lives in a small terraced home, scratches a living as a painter-decorator, and will, to the end of his days, remain bitter about the game of soucer.

Six or seven years ago, playing for his club Southend against a Dutch team, Peter Watson broke his jaw. He was "retired" at the age of 28 when it was found he suffered double vision and, having received the mandatory 750 compensation, was never allowed to return, even though he recovered his eyesight. He sued his club's doctor in court. won derisory damages, and is now too old to contemplate a return.

He, like Vogts this week, is a warning to all youngsters who build their life's hopes around the talent in their feet. It will not remain forever, and may not even be there as long as it ought to be.

Senatorial Splendor

NEW YORK — The latest mar-ble boundoggle will have wood-paneled offices with 16-foor With elections only four months ceilings, rise nine stories high and have a rooftop restaurant and two private toilets in every office. The imperial presidency may be dead but the spirit of Mussolini lingers

The sawdust Caesars who will inhabit this edifice will be mem-bers of the U.S. Senate. Not all of them, of course. The Senate is composed of 100 persons, and if you think a ninestory building is adequate to house

a bundred people, you have a good deal to learn about senators.

Senators require a lot of space in which to wage their ceaseless struggle against bureaucratic waste, bloated budgets and fiscal irresponsibility. To fight the battle they now have only two other office buildings and the Capitol building itself, in addition to free parking spaces and a couple of barber chairs in which they can fight profligacy by getting cut-rate haircuts.

The inadequacy of this space is well illustrated by the trouble they have had fighting bloat in the budget for their third office build-

In 1976 the building's projected cost was \$47.9 million. It soon became evident, bowever, that a Senate jammed into a mere Capitol and two office buildings occupying only two square blocks lacked the room for maneuver needed to turn back the forces of big spending, for the latest cost estimate has risen to \$122 million. Some senators say it will go higher than \$200 million.

This would put it in a class with such monuments to the taxpaver's forbearance as the Copagon on Pennsylvania Avenue, where the FBI is now headquartered in its struggle against big spending, and the Rayburn Building on the south side of Capitol Hill, where the House of Representatives toils to protect us all from wastrels.

Not surprisingly, the Senate bas been embarrassed by being caught with its new building in a cost overrun of 250 percent just now when

away and everybody furious about the things government has been doing with the money, not many politicians, even of senatorial grandeur, prefer to be caught treating themselves to the creature comforts of Croesus.

Accordingly, Sen. John Chafee of Rhode Island led a group last week trying to wash their hands of the money. They proposed to stop the new building and turn it into a park or a garage.

Cooler spirits carried the day. One of the glories making the Sen-ate numb to common passion is the fact that only one third of the members have to stand for re-election two years. While the one who must contend with the enraged taxpayer in November might prefer not to have to explain what the public is getting for those 16-foot ceilings, the other two thirds can afford to take the longer view. The building will rise. Grand-

Members did, however, vote to out a ceiling of \$135 million on its cost. This will give senators who have to campaign a fighting argument: to wit, re-elect me and I will bold government cost overnins to only 280 percent.

* * * With 50 new offices equipped with 100 private toilets, they might just have space to do it. The new rooftop restaurant, which will be reserved for senators only, should give them a strong defensive posinion from which to counterattack spending. If spending tries to advance from the Capitol building they will be able to bombard it with rolls and celery stalks.

The congressional real-estate boom is a reflection of what Sen. Daniel Movnihan has called the rise of "the imperial Congress." It is his thesis that once the presidency went imperial. Congress had no alternative but to do the same, that there was in fact a historical inevi-

tability in the development. The late Sen. Everett Dirksen, chiding his colleagues for spending money on a project in which he had no interest, once summed up the threat succinctly. "A billion here a billion there" he said, "and pretty soon you're talking about real money.

A Revealing Portrait of Bruno Walter

By Martin Bernheimer

L OS ANGELES — His real name was Bruno Walter Schlesinger. The world knew him, however, as Bruno Walter.

It also knew him as a musician of warmth. sensitivity and intelligence, and as a person of rare honor. He was a philosopher, a composer, a man of letters and, above all, a conductor who valued art over ego. Before his death at 85 in Beverly Hills 16

years ago, he produced a vast legacy of recorded performances — some commercial, some pirated from live concerts - and a few books: an essay on the moral powers of music (1935), a pioneering study of Gustav Mahler (1936, revised in 1958) and an autobiography, aptly titled "Theme and Variations" (1946).

In many ways, however, the most revealing portrait of Bruno Walter emerges in a collection of his letters published in Germany nearly a decade ago. For some reason, the Walter correspondence has not been translated for distribution in the United States or in England.

But now an organization called Educational Media Associates of America (PO Box 921, Berkeley, Calif. 94701) has volunteered some samples of what has been withheld. An amateurishly produced but well-edited 17-page booklet provides more than a suggestion of the missing autobiographical links. The "Selected Letters" may be ordered for \$1.

The first letter in this collection dates back to 1901, when Walter was 25 and a fledgling conductor at the Vienna Opera. He reported to his parents "the most important news: 'Aida' has been quite excellent; Mahler and his whole circle congratulated me most cordially

Blemished Joy

His joy was blemished, however, by a hos-tile press: "Enclosed I am sending you some reviews; they are all like this, unpleasant, unobjective, stupid, or better: ridiculous. Mahler tells me that nothing is less import-ant than what the local press is writing; they are a bunch of idiots barking at every new face like dogs. Then for a while they keep growling, and after several years it will be 'our Walter.'

Although he actually suffered very little during his career at the hands of critical foes, Walter never learned to admire his chroniclers. In a letter written to a friend on the same day back in 1901, he alluded indirectly to one possible reason for his initial journalistic unpopularity:

"The political conditions here are untenable . . . And-Semitism is immense, at least on paper. There are newspapers with nothing in them except: 'Jewish swindlers, 'Jewish vileness, 'another Jewish outrage,' etc., and underneath these beadlines the most infamous abuses."

Forty-eight years later, in a letter to his

troubled and controversial colleague Wilhelm Furtwaengler, Walter asserts his characteristic stand against prejudice: "I myself don't accept any collective judgment at all, whether it's a matter of 'the Germans,' or 'the Jews,' 'the French,' 'the musicians' or

"Others" apparently did not include crit-

Strong Tolerance

A man of strong tolerance in important areas. Walter apparently harbored equally strong intolerances in unimportant areas. His first exposure to the United States took him to New York in 1923. He wrote

these wide eyed impressions to his wife from his room in the Great Northern Hotel: "I bave been sitting for a week already in this gigantic, really great city and still can't quite realize were I am. People everywhere are marvelously nice . . . and they pay me in advance for my glamor, so to speak . . . I have not even had to eat meals alone, and that's what tires me out most of all: The social life devours me. It is no fun to be invited for lunch and dinner every day. But that is part of it in this country, they tell me, and to this obligation Pm sacrificing my rest, my comfort and the tendency to live . . . The city is simply overpowering. What impresses me most are not the tall buildings . . . it is the incomparable organization of this buge machine . . . An example: Through one of the avenues chase three, four, even five rows of automobiles at top speed - much faster than they are permitted at home; they run without interruption and nobody can cross the street. Then a red light . . . lights up; all cars stop immediately and pedestrians cross the street . . . It's unthinkable that one could live here forever, but for a time it's most interesting."

At the outbreak of World War II, the unthinkable became a realty; and Walter settled permanently in the land of the free-

Musically, Walter always was a purist. He respected the composers be served, and resented anything that might suggest interpretive interference. He was especially adamant on the subject when it came to Gustav Mahler. This occasioned an unpleasant exchange with the composer's widow in 1923, when she proposed posthumous completion of the Tenth Symphony.

Mahler's Wishes

"You know as well as I do,"" Walter wrote, "that in Mahler's practice only the existence of a final clean copy indicated that the work was ready for publication . . . You wrote that you had heard from several parties that I am 'angry' at you about the whole thing. That is right. But what I mind is . . . that you disregarded Mahler's wishes, explicit or implicit . . . I regret deeply that you have not respected [an] aversion deeply embedded in his character and his work, and have exposed to publicity a torso, lacking the touch of Mahler which kept improving and making minute changes lin to proving and making minute changes up to the last minute and was in this respect irre-

A few months before Walter's death, he still adhered to the same loyal, unbending principles. Another letter to Alma Mahler:
"I agree with you . . that despite all the recognition of the idealistic attitude and striving for faithfulness in the work of Mr. Deryck Cooke [whose realization of the Tenth was to be performed a decade later, you declare the work as inadmissable. The weakness of your situation is that, unfortunately, you gave permission years ago to Krenek for completion of the Tenth . The uncompleted work of a musical

most gifted and devoted musician.
"What atrocities are bappening in a similar context, I have only recently learned through a friend, namely that Beethoven's Fifth Symphony was played in jazz-style. By such crimes, nothing is evidenced except ignorance of the creative process.
